1. ACKNOWLEDGEMENT OF INDIGENOUS TERRITORY
2. MINUTES OF MEETING #5/19, HELD ON JUNE 7, 2019  
[Meeting Minutes Link](#)
3. BUSINESS ARISING FROM THE MINUTES
4. DISCLOSURE OF PECUNIARY INTEREST AND THE GENERAL NATURE THEREOF
5. DELEGATIONS

6.	<b>PRESENTATIONS</b>	
7.	<b>CORRESPONDENCE</b>	
8.	<b>SECTION I - ITEMS FOR BOARD OF DIRECTORS ACTION</b>	
8.1	<b>REQUEST FOR TENDER FOR ASHBRIDGES BAY TREATMENT PLANT LANDFORM PROJECT – CONSTRUCTION OF EAST AND CENTRAL BREAKWATERS</b>	4
	Award of Request for Tender (RFT) No. 10021138 for Construction of the East and Central Breakwaters as part of the Ashbridge's Bay Treatment Plant Landform Project.	
8.2	<b>ENCROACHMENT AGREEMENT WITH HEIDI FRANCIS FALCKH</b>	10
	Request to enter into an encroachment agreement with Heidi Francis Falckh as a means of resolving an encroachment for an armour stone retaining wall and wooden deck structure partially located on Toronto and Region Conservation Authority (TRCA) owned land adjacent to 290 Nashville Road, City of Vaughan, Regional Municipality of York, Humber River watershed. (CFN 54792)	
8.3	<b>REQUEST FOR A PERMANENT EASEMENT, DERRYDOWNS PARK (BETWEEN 267 AND 273 DERRYDOWN ROAD), CITY OF TORONTO, HUMBER RIVER WATERSHED</b>	14
	Receipt of a request from the City of Toronto, for a permanent easement on Toronto and Region Conservation Authority-owned lands required for a storm sewer for the City of Toronto's Basement Flooding Protection Program, located south of Finch Avenue West and east of Jane Street, known as Derrydowns Park (between 267 and 273 Derrydown Road), in the City of Toronto, Humber River watershed. (CFN 61735)	
8.4	<b>REQUEST FOR A PERMANENT EASEMENT, DERRYDOWNS PARK (BETWEEN 38 AND 44 FULWELL CRESCENT), CITY OF TORONTO, HUMBER RIVER WATERSHED</b>	18
	Receipt of a request from the City of Toronto, for a permanent easement on Toronto and Region Conservation Authority-owned lands for a storm sewer for the City of Toronto's Basement Flooding Protection Program, located south of Finch Avenue West and east of Jane Street, known as Derrydowns Park (between 38 and 44 Fulwell Crescent), in the City of Toronto, Humber River watershed. (CFN 61736)	
9.	<b>SECTION II - ITEMS FOR EXECUTIVE COMMITTEE ACTION</b>	
10.	<b>SECTION III - ITEMS FOR THE INFORMATION OF THE BOARD</b>	
11.	<b>SECTION IV - ONTARIO REGULATION 166/06, AS AMENDED</b>	
	<b><u>MAJOR PERMIT APPLICATION 11.1 – REGULAR – FOR APPROVAL</u></b>	
	Applications that involved a more complex suite of technical studies to demonstrate consistency with policies; applications that cover a significant geographic area, extensive modifications to the landscape, major infrastructure projects, applications requiring site specific conditions and permissions that extend beyond two years.	

## TOWN OF CALEDON

- 11.1 GREYPAN EQUITIES INC. GREYPAN 4 PROPERTIES GP INC.** 22
- To construct, reconstruct, erect or place a building or structure, site grade, temporarily or permanently place, dump or remove any material, originating on the site or elsewhere and interfere with a wetland on Part Lot 8, 9, Concession 5, (4 to 6 Manchester Court), in the Town of Caledon, Humber River Watershed as located on the property owned by Greypan 4 Properties GP Inc.; Greypan Equities Inc.
- 11.2 STANDARD DELEGATED PERMITS** 27
- Delegated Permits are processed by Planning and Development Division staff, authorized by designated staff appointed as Enforcement Officers by the Board of Directors and received monthly by the Executive Committee. Delegated permits are categorized as standard, routine infrastructure works, emergency infrastructure works, minor works and permits after the fact/resolution of violations. Standard permits are non-complex permissions consistent with TRCA approved policies and procedures and issued for a time period of two years or less.
- STANDARD DELEGATED PERMITS FOR RECEIPT – STAFF APPROVED AND ISSUED (Page 27)
- PERMISSION FOR ROUTINE INFRASTRUCTURE WORKS FOR RECEIPT – STAFF APPROVED AND ISSUED (Page 29)
- MINOR WORKS LETTER OF APPROVAL FOR RECEIPT – STAFF APPROVED AND ISSUED (Page 29)
- PERMITS AFTER THE FACT / RESOLUTION OF VIOLATIONS FOR RECEIPT – STAFF APPROVED AND ISSUED (Page 32)

## **12. NEW BUSINESS**

NEXT MEETING OF THE EXECUTIVE COMMITTEE #7/19, TO BE HELD  
ON FRIDAY, AUGUST 9, 2019 AT 9:30 A.M. AT HEAD OFFICE, 101 EXCHANGE  
AVENUE, VAUGHAN

John MacKenzie, Chief Executive Officer

/af

### Section I – Items for Board of Directors Action

**TO:** Chair and Members of the Executive Committee  
Meeting #6/19, Friday, July 05, 2019

**FROM:** Michael Tolensky, Chief Financial and Operating Officer

**RE:** **REQUEST FOR TENDER FOR ASHBRIDGES BAY TREATMENT PLANT  
LANDFORM PROJECT – CONSTRUCTION OF EAST AND CENTRAL  
BREAKWATERS**  
RFT No. 10021138

---

#### **KEY ISSUE**

Award of Request for Tender (RFT) No. 10021138 for Construction of the East and Central Breakwaters as part of the Ashbridge's Bay Treatment Plant Landform Project.

#### **RECOMMENDATION**

**WHEREAS** Toronto and Region Conservation Authority (TRCA) is engaged in a project that requires marine based general contracting services;

**AND WHEREAS** TRCA solicited tenders through a publicly advertised process;

**THEREFORE THE EXECUTIVE COMMITTEE RECOMMENDS THAT** Request for Tender (RFT) No. 10021138 for Construction of the East and Central Breakwaters be awarded to H.R. Doornekamp Construction Ltd. at a total cost not to exceed \$27,363,894 plus applicable taxes, to be expended as authorized by Toronto and Region Conservation Authority (TRCA) staff;

**THAT** TRCA staff be authorized to approve additional expenditures to a maximum of \$2,736,389 (10% of the project cost), plus applicable taxes, in excess of the contract cost as a contingency allowance if deemed necessary;

**THAT** should TRCA staff be unable to negotiate a contract with the above-mentioned proponent, staff be authorized to enter into and conclude contract negotiations with other Proponents that submitted quotations, beginning with the next lowest bid meeting TRCA specifications;

**AND FURTHER THAT** authorized TRCA officials be directed to take whatever action may be required to implement the contract, including the obtaining of necessary approvals and the signing and execution of any documents.

#### **BACKGROUND**

On May 2, 2012, TRCA was notified of the Toronto Council decision on April 10 and 11, 2012 to direct Toronto Water to enter into a joint initiative with TRCA to lead an Environmental Assessment Study that considers a landform south of the Ashbridge's Bay Wastewater Treatment Plant, to provide for the construction of the Coatsworth Cut stormwater treatment wetland and combined sewer overflow high-rate treatment facility, and that integrates these projects with other projects planned for the area.

## Item 8.1.

At Authority Meeting #5/12, held on June 22, 2012, RES.#A96/12 provided staff direction to lead the Environmental Assessment Study, in collaboration with Toronto Water, Parks, Forestry and Recreation, Toronto Waterfront Secretariat, and Toronto Waterfront Revitalization Corporation. TRCA then proceeded to undertake a Conservation Ontario Class Environmental Assessment (Class EA) to support the advancement of the project, resulting in the study entitled "Ashbridge's Bay Erosion and Sediment Control Project – Conservation Ontario Class EA". This Class EA study identified a preferred alternative that consists of erosion and sediment control structures that integrate with the lakefill area required for the City's planned facilities and provides a long-term solution to address the sedimentation issue with the Coatsworth Cut navigation channel which TRCA currently maintains through a \$250,000 per year dredging program.

In June 2014, Toronto City Council authorized the finalization of the Environmental Study Report for the Class EA and authorized Toronto Water to undertake the detailed design of the Ashbridge's Bay Treatment Plant Landform Project as a joint initiative to be led by TRCA. In 2017, TRCA coordinated the detailed design for the Ashbridge's Bay Treatment Plant Landform, incorporating the approved design concepts as outlined in the City of Toronto's Coatsworth Cut and Don River and Central Waterfront EAs and TRCA's Ashbridge's Bay Erosion and Sediment Control EA. The detailed design process was completed in 2018. Permits/authorizations have been submitted to Transport Canada and Department of Fisheries and Oceans. Once these are approved a Harbour Master Authorization application will be submitted to Ports Toronto (July 2019).

The final design of the Ashbridges Bay Treatment Plant Landform Project consists of approximately 27 ha of new land (lakefill) and is composed three distinct elements:

- a 16.4 ha land base protected by an armour stone headland-cobble beach system and a rip rap revetment;
- a 710 m long central breakwater, constructed from the west side of Coatsworth Cut; and
- a smaller 100 m long east breakwater, constructed from the southernmost headland of Ashbridges Bay Park.

Given the scope of the Landform Project, an estimated five to six-year phased approach is required to construct the works commencing in 2019. The phases are as follows and depicted in the map included as Attachment 1:

- Phase 1 – Construction of the Cell 1 confinement berm for the land base, filling of Cell 1, and construction of the headland-beach system and submerged shoals associated with Cell 1
- Phase 2 – Construction of the east breakwater
- Phase 3 – Construction of the Cell 2 confinement berm for the land base, filling of Cell 2, and construction of the headland-beach system and submerged shoals associated with Cell 2
- Phase 4 – Construction of the central breakwater
- Phase 5 – Construction of the Cell 3 confinement berm (revetment) for the land base and filling of Cell 3

Construction of the central and east breakwaters will be contracted out and the supply and placement of the required rip rap and armourstone will be by barge. This method was chosen because of site access limitations. For the east breakwater this method will also minimize impacts to Ashbridges Bay Park users. The central and east breakwater in tandem will provide a

## Item 8.1.

long-term solution to address the sedimentation issue within the Coatsworth Cut Navigation channel and alleviate annual dredging costs.

As the east breakwater provides requisite protection to the central breakwater and the eastern portion of the land base, it will be constructed first. Construction of the eastern breakwater is anticipated to take one construction season and is scheduled to run from August 1st, 2019 to December 31st, 2020.

Because of its length, and difficulty in winter barge construction, the central breakwater has been divided into three construction seasons with three separate mobilizations and demobilizations. Construction will be undertaken between July 1<sup>st</sup>, 2020 to December 31<sup>st</sup>, 2022.

### **RATIONALE**

At Board of Directors meeting #4/19, held on April 26, 2019, RES.#A58/19 provided staff with direction to negotiate and enter into and execute one or more service agreements with the City of Toronto to construct the Ashbridges Bay Treatment Plant Landform. TRCA is currently working with Toronto Water to finalize an interim letter agreement and licence agreement for pre-construction planning and mobilization. Circulation of the draft implementation agreement for TRCA is pending.

TRCA has undertaken the necessary pre-planning procurement to put the project in a position to move forward with construction upon execution of the implementation agreement with the City of Toronto. Request for Pre-Qualification (RFPQ) statements for general contractors to pre-qualify for construction services for the central and east breakwater was publicly advertised on the electronic procurement website *Biddingo* ([www.biddingo.com](http://www.biddingo.com)) on March 7, 2019. General contractors interested in pre-qualifying were advised that the criteria for evaluation will include the following in order to receive a tender package:

- completeness of submission;
- past experience with construction within environmentally sensitive areas;
- construction of similar erosion control works;
- experience with installation and maintenance of erosion and sediment control measures;
- shoreline protection works;
- habitat enhancement and regeneration projects;
- waterfront development projects;
- ability to meet construction schedule milestones;
- ability to coordinate work by others;
- implementation of construction projects with budgets ranging between \$10,000,000 to \$25,000,000;
- experience working on Lake Ontario or similar sized water bodies; and
- familiarity with relevant environmental legislation and procedures relating to construction within environmentally sensitive areas, watercourses and within TRCA's jurisdiction.

A total of five (5) addendums were issued to respond to questions received.

On March 29, 2019, TRCA received pre-qualification submissions from the following eleven (11) general contractors:

- Atlantis Marine Construction Canada Inc.;
- Clearway Construction Inc.;
- CSL Group;

## Item 8.1.

- Dean Construction Company Ltd.;
- Doornekamp Construction Ltd.;
- EBC Inc.;
- EllisDon Civil Ltd.;
- Galcon Marine Ltd.;
- Graham Construction and engineering LP;
- McNally Construction Inc.; and
- Metric Contracting Services Corp.

Following receipt of the submissions, pre-qualifying documents were reviewed by the selection committee made up of TRCA staff. Evaluations were based on the criteria defined above. Based on the evaluation process, Request for Tender (RFT) documents were made available on May 22, 2019 to the following eight (8) general contractors:

- Atlantis Marine Construction Canada Inc.;
- Dean Construction;
- Doornekamp Construction Ltd.;
- EllisDon Civil Ltd.;
- Galcon Marine Ltd.;
- Graham Construction and engineering LP;
- McNally Construction; and
- Metric Contracting Services Corp.

A mandatory bidders meeting/site tour was held on May 28, 2019. The RFT closed on June 21, 2019.

A total of five (5) addendums were issued to respond to questions received.

A total of four (4) proponent(s) declined the opportunity to bid due to current workload and inability to take on additional work.

The Procurement Opening Committee opened the Tenders on June 17, 2019 at 1:00 pm with the following results:

### **RFT No. 10021138**

<b>BIDDERS</b>	<b>TOTAL TENDER AMOUNT (excl. HST)</b>
<b>H.R. Doornekamp Construction Ltd.</b>	<b>\$27,363,894</b>
<b>McNally Construction Incorporated</b>	<b>\$32,934,670</b>
<b>Atlantis Marine Construction Canada Inc.</b>	<b>\$38,741,868</b>
<b>Dean Construction Company Ltd.</b>	<b>\$62,765,880</b>

## Item 8.1.

Staff reviewed the bid received from H.R. Doornekamp Construction Ltd. against its own cost estimate and has determined that the bid is of reasonable value and meets the requirements as outlined in the RFT documents. Further assessment by TRCA staff of H.R. Doornekamp Construction Ltd. Experience and ability to undertake similar projects was conducted through reference checks which resulted in positive feedback that H.R. Doornekamp Construction Ltd. is capable of undertaking the scope of work.

TRCA staff recommended that contract No. #10021138 be awarded to H.R. Doornekamp Construction Ltd. at a total cost not to exceed \$27,363,894 plus 10% contingency, plus applicable taxes, it being the lowest bid meeting TRCA's specifications.

### **Relationship to Building the Living City, the TRCA 2013-2022 Strategic Plan**

This report supports the following strategic priority set forth in the TRCA 2013-2022 Strategic Plan:

**Strategy 2 – Manage our regional water resources for current and future generations**

**Strategy 7 – Build partnerships and new business models**

**Strategy 12 – Facilitate a region-wide approach to sustainability**

### **FINANCIAL DETAILS**

The estimated project cost for construction of the Ashbridges Bay Treatment Plant Landform Project is \$96.0 million net of all applicable taxes (\$97.7 million net of HST recoveries). TRCA will work with the City of Toronto to further refine the implementation budget prior to signing a service agreement to undertake the work. The contract for RFT 10021138 will not be awarded until an implementation agreement is in place with the City of Toronto that will facilitate transfer of funds to TRCA allowing the recovery of all implementation expenses on a cost recovery basis plus an administrative fee (to not exceed 5%). Funds to support the contract for RFT 10021138 will be recovered through the implementation agreement and tracked under account code 183-02.

### Section I – Items for Board of Directors Action

**TO:** Chair and Members of the Executive Committee  
Meeting #6/19, Friday, July 05, 2019

**FROM:** Michael Tolensky, Chief Financial and Operating Officer

**RE:** **ENCROACHMENT AGREEMENT WITH HEIDI FRANCIS FALCKH**  
Toronto and Region Conservation Authority-Owned Lands Adjacent to 290  
Nashville Road, City of Vaughan, Regional Municipality of York, Humber River  
Watershed. CFN 54792

---

#### KEY ISSUE

Request to enter into an encroachment agreement with Heidi Francis Falckh as a means of resolving an encroachment for an armour stone retaining wall and wooden deck structure partially located on Toronto and Region Conservation Authority (TRCA) owned land adjacent to 290 Nashville Road, City of Vaughan, Regional Municipality of York, Humber River watershed.

#### RECOMMENDATION

**THE EXECUTIVE COMMITTEE RECOMMENDS THAT** Toronto and Region Conservation Authority (TRCA) enter into an encroachment agreement with Heidi Francis Falckh as a means of resolving an encroachment for an armour stone retaining wall and wood deck structure partially located on Toronto and Region Conservation Authority-owned land described as Part 1 on Plan 64R-4108 located adjacent to 290 Nashville Road, City of Vaughan, Regional Municipality of York, Humber River watershed.

**THAT** the encroachment agreement includes the key following terms and conditions:

- (i) that the use of the land for the encroaching structure be for the nominal sum of \$2.00;
- (ii) at any time TRCA has the option to request removal of the retaining wall and deck structure and upon request, the owner agrees to do so within 180 days at their sole cost;
- (iii) that the retaining wall and deck structure is to be maintained by the owner at its sole cost, used in the same manner as present and is not to be enlarged or altered;
- (iv) that the owner accepts the lands at their risk and shall at all times indemnify, save harmless and defend TRCA from any claims arising out of the encroachment;
- (v) that the owner will maintain public liability and property damage insurance in an amount of \$5,000,000 naming TRCA as an additional insured, throughout the duration of the agreement;
- (vi) the owner is responsible for all costs associated with the preparation and registration of the encroachment agreement including TRCA's legal costs.

**THAT** any other terms and conditions of the agreement be satisfactory to TRCA staff and solicitor;

**AND FURTHER THAT** authorized officials be directed to take the necessary action to implement the agreement including obtaining any approvals and the signing and execution of documents.

## Item 8.2.

### BACKGROUND

In 2015 an encroachment comprising armour stone retaining walls, a wooden deck structure and safety rail came to the attention of TRCA staff. In September 2015, TRCA staff met with the owner and the owner's spouse and representative, to view the encroachments. The area of concern comprises a number of closely located tiered armour stone retaining walls and a triangular portion of a deck situated on the western boundary that encroaches approximately five metres onto TRCA owned land. These walls retain a significant amount of fill materials, which are placed at a very steep angle. A section of the lower armour stone retaining wall has encroached onto TRCA owned land.

Based upon geotechnical staff review, the removal of the encroaching portion of the lower retaining wall is not feasible due to the steep slope and significant amount of fill being retained. Removal of the encroaching wall could initiate further movement of the fill materials behind the wall. As the upper retaining walls are connected to the lower retaining walls, it is anticipated that the upper walls would also be vulnerable to failure if there was movement of the existing fill materials caused by removal of the lower wall. It is recommended that the encroaching portion of the wall not be removed to mitigate any further adverse effects to the slope.

Accordingly, the owner has requested that TRCA enter into an agreement as a way of resolving that portion of the encroaching retaining wall and associated deck structure.

The subject TRCA-owned lands were acquired from Humber Estates Co. Ltd., on 22 October 1974 under the Humber River Flood Plain Lands project.

Attachment 1 is a sketch illustrating the location of the subject lands and the location of the encroachment. Attachment 2 is an orthophoto illustrating the location of the subject lands and the location of the encroachment.

### RATIONALE

An encroachment agreement will appropriately transfer the risk and liability of the encroaching structures to the owner and regulate its ongoing use, while ensuring that the structure can remain in place and mitigate any adverse effects to the slope.

### Relationship to Building the Living City, the TRCA 2013-2022 Strategic Plan

This report supports the following strategy set forth in the TRCA 2013-2022 Strategic Plan:

**Strategy 4 – Create complete communities that integrate nature and the built environment**

### FINANCIAL DETAILS

The owner is responsible for all costs of the preparation and registration of the encroachment agreement.

### Section I – Items for Board of Directors Action

**TO:** Chair and Members of the Executive Committee  
Meeting #6/19, Friday, July 05, 2019

**FROM:** Michael Tolensky, Chief Financial and Operating Officer

**RE:** **CITY OF TORONTO**  
Request for a Permanent Easement on Toronto and Region Conservation Authority-owned Lands, Derrydowns Park (between 267 and 273 Derrydown Road), City of Toronto, Humber River Watershed. CFN 61735

---

#### KEY ISSUE

Receipt of a request from the City of Toronto, for a permanent easement on Toronto and Region Conservation Authority-owned lands required for a storm sewer for the City of Toronto's Basement Flooding Protection Program, located south of Finch Avenue West and east of Jane Street, known as Derrydowns Park (between 267 and 273 Derrydown Road), in the City of Toronto, Humber River watershed.

#### RECOMMENDATION

**WHEREAS** the Toronto and Region Conservation Authority (TRCA) is in receipt of a request from the City of Toronto for a permanent easement on TRCA-owned lands required for a storm sewer for the City of Toronto's Basement Flooding Protection Program, located south of Finch Avenue West and east of Jane Street, known as Derrydowns Park (between 267 and 273 Derrydown Road), in the City of Toronto, Humber River watershed;

**AND WHEREAS** it is in the best interest of TRCA in furthering its objectives as set out in Section 20 of the *Conservation Authorities Act* to cooperate with City of Toronto in this instance;

**THEREFORE THE EXECUTIVE COMMITTEE RECOMMENDS THAT** TRCA grant to the City of Toronto a permanent easement for a storm sewer on TRCA-owned land containing 0.098 hectares (0.242 acres), more or less, of vacant land, cross hatched in yellow on the Toronto Water Sketch Plan dated May 2019, in the City of Toronto;

**THAT** consideration be the nominal sum of \$2.00 and all legal, survey and other costs to be paid by the City of Toronto;

**THAT** the City of Toronto is to fully indemnify TRCA from any and all claims from injuries, damages or costs of any nature resulting in any way, either directly or indirectly, from this conveyance or the carrying out of construction;

**THAT** said conveyance be subject to informing the Minister of Natural Resources and Forestry in accordance with Section 21(2) of the *Conservation Authorities Act*, R.S.O. 1990, Chapter C.27, as amended;

## Item 8.3.

**AND FURTHER THAT authorized TRCA officials be directed to take the necessary action to finalize the transaction, including obtaining any necessary approvals and the signing and execution of documents.**

### **BACKGROUND**

The City of Toronto has requested a permanent easement on TRCA-owned lands, required for a storm sewer for the City of Toronto's Basement Flooding Protection Program, located south of Finch Ave West and east of Jane Street, known as Derrydowns Park (between 267 and 273 Derrydown Road), in the City of Toronto, Humber River watershed.

The subject TRCA-owned lands were acquired for nominal value from the Corporation of the Borough of North York in February 1973 and expropriated from Mary Heinrich in June 1964 under the Humber River Flood Plain Lands project.

Attached is a sketch illustrating the location of the subject lands. Attached is an orthophoto of the location of the subject lands.

### **RATIONALE**

The sewer works have been completed in accordance with a permit under Ontario Regulation 166/06 Permit No. C-151034 dated December 16, 2015 issued by TRCA's Planning and Development department.

City of Toronto has requested that the permanent easement be granted for nominal consideration of \$2.00 for the purposes of the Basement Flooding Protection Program.

### **Relationship to Building the Living City, the TRCA 2013-2022 Strategic Plan**

This report supports the following strategy set forth in the TRCA 2013-2022 Strategic Plan:  
**Strategy 4 – Create complete communities that integrate nature and the built environment**

### **FINANCIAL DETAILS**

The City of Toronto has agreed to assume all legal, survey and other costs involved in completing this transaction.

## Item 8.4.

**AND FURTHER THAT authorized TRCA officials be directed to take the necessary action to finalize the transaction, including obtaining any necessary approvals and the signing and execution of documents.**

### **BACKGROUND**

The City of Toronto has requested a permanent easement on TRCA-owned lands, required for a storm sewer for the City of Toronto's Basement Flooding Protection Program, located south of Finch Ave West and east of Jane Street, known as Derrydowns Park (between 38 and 44 Fulwell Crescent), in the City of Toronto, Humber River watershed.

The subject TRCA-owned lands were acquired for nominal value from the Corporation of the Borough of North York, in June 1973 and from expropriated from Greenwin Construction and Revenue Properties Central Development in 1966 under the Humber River Flood Plain Lands project.

Attached is a sketch illustrating the location of the subject lands. Attached is an orthophoto of the location of the subject lands.

### **RATIONALE**

The sewer works have been completed in accordance with a permit under Ontario Regulation 166/06 Permit No. C-140812 dated November 7, 2014 issued by TRCA's Planning and Development department.

City of Toronto has requested that the permanent easement be granted for nominal consideration of \$2.00 for the purposes of the Basement Flooding Protection Program.

### **Relationship to Building the Living City, the TRCA 2013-2022 Strategic Plan**

### Section IV – Ontario Regulation 166/06, As Amended

**TO:** Chair and Members of the Executive Committee  
Meeting #6/19, July 5, 2019

**FROM:** Sameer Dhalla, Interim Director, Development and Engineering Services

**RE:** **APPLICATIONS FOR PERMITS PURSUANT TO ONTARIO REGULATION 166/06, AS AMENDED**  
Development, Interference with Wetlands and Alterations to Shorelines and Watercourses

---

#### KEY ISSUE

Pursuant to Ontario Regulation 166/06, as amended, written permission from the Authority is required for:

- a) straightening, changing, diverting or interfering in any way with the existing channel of a river, creek, stream or watercourse, or for changing or interfering in any way with a wetland;
- b) development, if in the opinion of the Authority, the control of flooding, erosion, dynamic beaches or pollution or the conservation of land may be affected by the development.

A permit may be refused through a Hearing Process, if in the opinion of the Authority, the control of flooding, erosion, dynamic beaches, pollution or the conservation of land is affected.

#### RECOMMENDATION

**THAT permits be granted in accordance with Ontario Regulation 166/06, as amended, for the applications which are listed below:**

#### **MAJOR PERMIT APPLICATIONS 11.1 – REGULAR – FOR APPROVAL**

Applications that involved a more complex suite of technical studies to demonstrate consistency with policies; applications that cover a significant geographic area, extensive modifications to the landscape, major infrastructure projects, applications requiring site specific conditions and permissions that extend beyond two years.

#### **TOWN OF CALEDON**

##### **GREYPAN EQUITIES INC. GREYPAN 4 PROPERTIES GP INC.**

To construct, reconstruct, erect or place a building or structure, site grade, temporarily or permanently place, dump or remove any material, originating on the site or elsewhere and interfere with a wetland on Part Lot 8, 9, Concession 5, (4 to 6 Manchester Court), in the Town of Caledon, Humber River Watershed as located on the property owned by Greypan 4 Properties GP Inc.; Greypan Equities Inc..

## Item 11.1.

The purpose is to undertake works within TRCA's Regulated Area of the Humber River Watershed in order to facilitate the construction of a 20,071.38 sq.m (216,046.53 sq.ft) addition to the existing industrial warehouse facility located at 4-6 Manchester Court in the Town of Caledon. Site works also include the construction of an associated parking lot as well as a wetland compensation and upland enhancement area. The works are associated with a municipal Site Plan application (Town File: SP18-0017) and building permit.

**MAP LOCATION:** 4-6 Manchester Court, Caledon

The permit will be issued for the period of July 5, 2019 to July 4, 2021 in accordance with the following documents and plans which form part of this permit:

- **Drawing No. 17104-G1, Area Grading Plan, prepared by V.A. Piscione, revision no. 10 dated February 5, 2019, received by TRCA on May 17, 2019;**
- **Drawing No. 17104-G2, Site Servicing Plan, prepared by V.A. Piscione, revision no. 11 dated April 16, 2019, received by TRCA on May 17, 2019;**
- **Drawing No. 17104-G3, Details and Grading Sections, prepared by V.A. Piscione, revision no. 10 dated February 5, 2019, received by TRCA on May 17, 2019;**
- **Drawing No. 17104-G4, Grading Sections, prepared by V.A. Piscione, revision no. 10 dated February 5, 2019, received by TRCA on May 17, 2019;**
- **Drawing No. L-1, Landscape Plan, prepared by Hin Tat Lam, revision no. 9 dated October 17, 2018, received by TRCA on May 17, 2019;**
- **Drawing No. L-1, Existing Tree Preservation and Removal Plan, prepared by JVF Consultants Inc., revision no. 6 dated October 2018, received by TRCA on May 17, 2019;**
- **Drawing No. L-2, Landscape Plan Enlargement Building "A" Addition, prepared by JVF Consultants Inc., revision no. 6 dated October 2018, received by TRCA on May 17, 2019;**
- **Drawing No. L-3, Landscape Details and Landscape Specifications, prepared by JVF Consultants Inc., revision no. 4 dated October 2018, received by TRCA on May 17, 2019;**

## Item 11.1.

- Drawing No. L-4, Landscape Details, prepared by JVF Consultants Inc., revision no. 3 dated October 2018, received by TRCA on May 17, 2019;
- Drawing No. 17104-ESC1, Area Erosion and Sediment Control Plan (Stage - 1), prepared by V.A. Piscione, revision no. 1 dated July 25, 2018, received by TRCA on May 17, 2019;
- Drawing No. 17104-ESC2, Area Erosion and Sediment Control Plan (Stage - 2 Works), prepared by V.A. Piscione, revision no. 1 dated July 25, 2018, received by TRCA on May 17, 2019;
- Drawing No. 17104-ESC3, Area Erosion and Sediment Control Plan (Stage - 3, 4 and 5 Works), prepared by V.A. Piscione, revision no. 1 dated July 25, 2018, received by TRCA on May 17, 2019;
- Stormwater Management Report, prepared by V.A. Piscione, revised July 16, 2018, received by TRCA on May 17, 2019;
- Environmental Impact Study and Management Plan, prepared by Savanta, revised January 2019, received by TRCA on May 17, 2019;
- Letter of Undertaking, prepared by Andy Smele, dated April 23, 2019, received by TRCA on April 23, 2019;
- Cost Estimate for Construction and Monitoring of Wetland Compensation and Upland Enhancement Area, prepared by Savanta, dated April 22, 2019, received by TRCA on April 23, 2019;
- Opinion of Probable Landscaping Costs, prepared by Savanta, revised February 26, 2019, received by TRCA on April 23, 2019.

### **Application-Specific Permit Conditions**

14. The applicant provides as-built plans to the TRCA once the Wetland Compensation and Upland Enhancement Area (WCUEA) has been completed.

15. The applicant implements the Monitoring and Adaptive Management Strategy for the WCUEA as outlined within Section 7.2 of the Environmental Impact Study and Management Plan (prepared by Savanta, revised January 2019) for the entire proposed duration (5 years).

16. The applicant commits to hire a qualified environmental consultant to conduct the required monitoring in accordance with the Environmental Impact Study and Management Plan (prepared by Savanta, revised January 2019) for the entire proposed duration (5 years).

17. The applicant provides the selected environmental consultant with necessary funding to implement the Monitoring and Adaptive Management Strategy in general conformance with the cost estimate provided by Savanta (dated April 22, 2019).

18. The applicant provides the TRCA with annual monitoring status reports for the WCUEA, once constructed.

19. The applicant notifies and consults with the TRCA prior to the implementation of any adaptive management measures identified by the environmental consultant.

### **RATIONALE**

The application was reviewed by staff on the basis of the following information:

#### **Proposal:**

The purpose of this application is to undertake works within TRCA's Regulated Area in order to facilitate the construction of a 20,071.38 sq.m (216,046.53 sq.ft) addition to the existing industrial warehouse facility located at 4-6 Manchester Court in the Town of Caledon. Site works also include the construction of an associated parking lot as well as a wetland compensation and upland enhancement area. The works are associated with a municipal Site Plan application (Town File: SP18-0017) and building permit.

## Item 11.1.

The subject property is located on the west side of Bolton, along a Canadian Pacific Rail corridor. The front portion of the site currently contains two industrial warehouse facilities and associated truck parking area while the rear portion of the property is vacant of any structures. On June 28, 2017, the Ministry of Natural Resources and Forestry (MNR) conducted a site visit of the vacant portion of the property with TRCA staff. Based on this site visit, it was determined that the rear portion of the site contains three (3) separate Provincially Significant Wetland (PSW) units as well as seven (7) small isolated wetland units which were not deemed to be significant. The rear portion of the site also contains a small headwater drainage feature which conveys minor flows from the site to a culvert located under the rail corridor.

The proposed works associated with this permit includes the construction of a rear addition to the southernmost existing industrial warehouse. The proposed addition and its associated parking area will be located on the currently vacant portion of the subject lands. In order to facilitate construction of the works, removal of the isolated wetland units as well as the headwater drainage feature will be required. Based on an assessment of the features by a qualified environmental consultant (Savanta), the isolated wetland features equal a total of 0.38 hectares and are largely dominated by invasive species (phragmites). No rare plants or amphibians were observed in these wetlands. A headwater drainage feature assessment was also conducted by the environmental consultant where it was determined that the headwater drainage feature on site do not provide direct fish habitat.

In order to compensate for the removal of the isolated wetland units, the applicant is proposing to construct five new wetland vegetation communities as well as an upland enhancement area on the north-west portion of the site (i.e. the Wetland Compensation and Upland Enhancement Area or WCUEA). A large bioswale will also be constructed along the north side of the property to replicate the function of the headwater drainage features to be removed. The wetland compensation is proposed to exceed a 1:1 removal to compensation ratio, resulting in a total area of 0.40 hectares of new wetland habitat. An additional 0.14 hectares of upland shrub thicket habitat and 0.05 hectares of nodal shrub and tree plantings are also proposed to be planted within the WCUEA. The goal of the proposed WCUEA is to establish a healthy and diverse ecosystem that replicates the ecological functions and size of the non-significant features slated for removal. The re-created wetlands will include online pools that provide appropriate breeding habitat for frogs and other species that share similar habitat preferences. Furthermore, additional wildlife enhancement features such as turtle basking logs, raptor perching poles and wildlife brush piles will also be implemented. Water flow will be directed to the WCUEA from one of the nearby PSW units as well as clean rooftop drainage from the adjacent industrial warehouse in order to support the planted vegetation communities. The proposed warehouse addition is appropriately setback from both the existing and proposed wetland features.

In addition to constructing the WCUEA, the applicant has also committed to conducting monitoring for a five (5) year period. The monitoring program will include assessments of planted vegetation as well as surveys of wetland hydrology and flora and fauna. Through this permit, the property owner has agreed to application specific conditions which will ensure the monitoring program is funded and executed for its entire proposed duration. Given the above, TRCA staff do not have any ecology concerns with this application. Furthermore, there are no flooding or geotechnical related concerns as well.

## Item 11.1.

### Control of Flooding:

The proposed works are located outside of the Regional Floodplain. As such, there are no anticipated impacts to the storage and/or conveyance of flood waters.

### Pollution:

A detailed erosion and sediment control plan has been developed by the applicant and will be implemented for the duration of construction to prevent the migration of sediment into the adjacent natural features.

### Dynamic Beaches:

Not applicable.

### Erosion:

There are no geotechnical and/or slope stability concerns anticipated with this project.

### Conservation of Land:

The removal of multiple isolated wetland units as well as a headwater drainage feature will be required to facilitate the proposed development. The removal of low functioning natural features will total 0.38 hectares. In order to compensate the removal of these features, the applicant is proposing to construct 0.40 hectares of new wetland habitat as well as an additional 0.14 hectares of upland shrub thicket and 0.05 hectares of nodal shrub and tree plantings (i.e. the Wetland Compensation and Upland Enhancement Area or WCUEA). Once complete, the WCUEA will result in a high functioning ecological system which exceeds a 1:1 replacement ratio. The project will result in a net ecological gain.

#### *Plantings*

Once earthworks for the WCUEA are complete, a comprehensive restoration plan will be implemented. The plantings will consist of emergent shallow marsh, thicket swamp, meadow marsh, upland cultural meadow and upland tree and shrub plantings. All proposed plantings will be native and non-invasive consistent with TRCA's guidelines.

### Policy Guidelines:

The proposal complies with Section 8.4 - General Regulation Policies - of The Living City Policies (LCP) for Planning and Development in the Watersheds of the Toronto and Region Conservation Authority.

### 11.2. STANDARD DELEGATED PERMITS

#### **STANDARD DELEGATED PERMITS FOR RECEIPT – STAFF APPROVED AND ISSUED**

Delegated Permits are processed by Planning and Development Division staff, authorized by designated staff appointed as Enforcement Officers by the Board of Directors and received monthly by the Executive Committee. Delegated permits are categorized as standard, routine infrastructure works, emergency infrastructure works, minor works and permits after the fact/resolution of violations. Standard permits are non-complex permissions consistent with TRCA approved policies and procedures and issued for a time period of two years or less.

#### **CITY OF MARKHAM**

##### **2305269 ONTARIO INCORPORATED - Rouge River Watershed**

The purpose is to undertake works within TRCA's Regulated Area of the Rouge River Watershed (Unionville Special Policy Area) to construct an addition to the existing dwelling located at 33 Eureka Street, Markham.

**CFN: 61032 - Application #: 0232/19/MARK**

## Item 11.2.

### **PERMITS AFTER THE FACT / RESOLUTION OF VIOLATIONS FOR RECEIPT – STAFF APPROVED AND ISSUED**

Permission for works undertaken without the benefit of a TRCA permit in a regulated area, where such works comply with TRCA policies and procedures, are considered permits after the fact and subject to an additional administrative fee.

#### **CITY OF BRAMPTON**

##### **147 BELLCHASE TRAIL - Humber River Watershed**

The purpose is to recognize the construction of a 7.4 m by 4.9 m (24.3 ft by 16.4 ft) deck with staircase located at the rear of an existing dwelling within TRCA's Regulated Area of the Humber River Watershed. The described works were initiated without the issuance of a TRCA or municipal building permit. As such, an additional permit application fee of 100% was charged for this "after-the-fact" permit. The subject property is located at 147 Bellchase Trail, in the City of Brampton.

**CFN: 61484 - Application #: 0475/19/BRAM**
