The Chair recited the Acknowledgement of Indigenous Territory.

RES.#B70/20 - MINUTES

Moved by: Paul Ainslie
Seconded by: Jack Heath

THAT the Minutes of Meeting #6/20 of the Executive Committee, held on October 2, 2020 be approved.

CARRIED

Section I – Items for Board of Directors Action

RES.#B71/20 - GREENLANDS ACQUISITION PROJECT FOR 2016-2020 (7476 KIPLING AVENUE)

Flood Plain and Conservation Component, Humber River Watershed Portside Developments (Kipling) Inc. (CFN 61641). Acquisition of property and conservation easement located at 7476 Kipling Avenue, in the City of Vaughan, Regional Municipality of York, under the “Greenlands Acquisition Project for 2016-2020,” Flood Plain and Conservation Component, Humber River watershed.

Moved by: Joanne Dies
Seconded by: Ronald Chopowick

THE EXECUTIVE COMMITTEE RECOMMENDS THAT 0.99 hectares (2.47 acres), more or less, of vacant land, located at 7476 Kipling Avenue, said land being Part of Lot 4, Concession 8 designated as Parts 4 and 5 on draft Plan of Survey prepared by Salna Surveying OLS, Job No:17010,CAD File: 7476-Kipling-RP6.DWG in the City of Vaughan, Regional Municipality of York, be purchased from Portside Developments (Kipling) Inc.;

THAT a conservation easement for the protection of the environmental features and functions containing 0.16 hectares (0.40 acres), more or less, said land being Part of Lot 4, Concession 8, designated as Parts 2 and 3 on draft Plan of Survey prepared by Salna Surveying OLS, Job NO:17010, CAD File: 7476-Kipling-RP6.DWG in the City of Vaughan, Regional Municipality of York, be purchased from Portside Developments (Kipling) Inc.; THAT a permanent easement of 0.06 hectares (0.15 acres), more or less, said land being Part of Lot 4, Concession 8, designated as Part 5 on draft Plan of Survey prepared by Salna Surveying OLS, Job NO: 17010, CAD File: 7476-Kipling-RP6.DWG be granted to Portside Developments (Kipling) Inc.;

THAT the purchase price be \$2.00;

THAT Toronto and Region Conservation Authority (TRCA) receive conveyance of the land free from encumbrance, subject to existing service easements;

THAT the firm Gowling WLG, be instructed to complete the transaction at the earliest possible date and all reasonable expenses incurred incidental to the closing for land transfer tax, legal costs, and disbursements are to be paid by TRCA;

AND FURTHER THAT authorized TRCA officials be directed to take the necessary action to finalize the transaction, including obtaining any necessary approvals and the signing and execution of documents.

CARRIED

BACKGROUND

Resolution #A161/15 at Authority Meeting #8/15, held on September 25, 2015, approved the Greenlands Acquisition Project for 2016-2020.

Negotiations have been conducted with Marcus Martins, Humphries Planning Group Inc. acting as agent for the owners.

Access to the subject lands will be achieved through access easement through the residential development.

Attachment 1 is a sketch illustrating the location of the subject lands. **Attachment 2** is an orthophoto illustrating the location of the subject lands.

RATIONALE

The subject lands fall within TRCA's approved master plan for acquisition for the Humber River watershed as outlined in the approved Greenlands Acquisition Project for 2016-2020. Through the review of the Official Plan Amendment Application (OP.13.003), Zoning By-law Amendment Application (Z.13.005), and OMB's Minutes of Settlement (PL130802 and PL130994) for residential development, TRCA staff established the limits of the open space land and conservation easement.

Relationship to Building the Living City, the TRCA 2013-2022 Strategic Plan

This report supports the following strategies set forth in the TRCA 2013-2022 Strategic Plan:

Strategy 3 – Rethink greenspace to maximize its value

Strategy 4 – Create complete communities that integrate nature and the built environment

TAXES AND MAINTENANCE

Based on preliminary property tax estimates, the property tax for subject parcel of land will be approximately \$1,500 annually. While it is expected that the subject parcel of land will not significantly impact TRCA's maintenance costs at this location, an assessment of the aggregate acquisitions in the area will be undertaken and the results will be integrated into TRCA's land management program and associated budgets.

FINANCIAL DETAILS

Funds for the costs related to this purchase are available in the TRCA land acquisition capital account.

RES.#B72/20 -

GREENLANDS ACQUISITION PROJECT FOR 2016-2020 (10390 PINE VALLEY DRIVE)

Flood Plain and Conservation Component, Humber River Watershed Country Wide Homes (Pine Valley Estates) Inc. (CFN 63436). Acquisition of property located west of Pine Valley Drive and south of Teston Road, municipally known as 10390 Pine Valley Drive, in the City of Vaughan, Regional Municipality of York, under the "Greenlands Acquisition Project for 2016-2020," Flood Plain and Conservation Component, Humber River watershed.

Moved by: Joanne Dies
Seconded by: Ronald Chopowick

THE EXECUTIVE COMMITTEE RECOMMENDS THAT 10.8 hectares (26.7 acres), more or less, of vacant land, located west of Pine Valley Drive and south of Teston Road, said land being Part of Lots 23 and 24 Concession 7, being Blocks 167 and 169 on draft Subdivision Plan, prepared by Schaeffer Dzaldov Bennett Ltd., municipally known as 10390 Pine Valley Drive, in the City of Vaughan, Regional Municipality of York, be purchased from Country Wide Homes (Pine Valley Estates) Inc.;

THAT the purchase price be \$2.00;

THAT Toronto and Region Conservation Authority (TRCA) receive conveyance of the land free from encumbrance, subject to existing service easements;

THAT the TRCA staff be instructed to complete the transaction at the earliest possible date and all reasonable expenses incurred incidental to the closing for land transfer tax, legal costs, and disbursements are to be paid by TRCA;

AND FURTHER THAT authorized TRCA officials be directed to take the necessary action to finalize the transaction, including obtaining any necessary approvals and the signing and execution of documents.

CARRIED

BACKGROUND

Resolution #A161/15 at Authority Meeting #8/15, held on September 25, 2015, approved the Greenlands Acquisition Project for 2016-2020.

Negotiations have been conducted with Sam Morra, Senior Vice President, Planning and Development, Condor Properties Ltd., and Solicitors acting as agent for the owners.

Access to the subject lands will be achieved through an appropriate 5-metre wide access, by way of a temporary easement, to be placed on the parcel of lands abutting to the north. The final location of which will be determined satisfactory to TRCA staff.

Attachment 1 is a sketch illustrating the location of the subject lands and **Attachment 2** is an Orthophoto of subject lands.

RATIONALE

The subject lands fall within TRCA's approved master plan for acquisition for the Humber River watershed as outlined in the approved Greenlands Acquisition Project for 2016-2020. Through the review of the draft Plan of Subdivision, 19T-06V12, for residential development, TRCA staff established the limits of the open space land.

Relationship to Building the Living City, the TRCA 2013-2022 Strategic Plan

This report supports the following set forth in the TRCA 2013-2022 Strategic Plan:

Strategy 4 – Create complete communities that integrate nature and the built environment

Strategy 3 – Rethink greenspace to maximize its value

TAXES AND MAINTENANCE

Based on TRCA's preliminary review of the environmental criteria for lands that are eligible to receive a property tax exemption under the provincial Conservation Land Tax Incentive Program, it appears that the subject property should be eligible for a tax exemption. While it is expected that the subject parcel of land will not significantly impact TRCA's maintenance costs at this location, an assessment of the aggregate acquisitions in the area will be undertaken and the results will be integrated into TRCA's land management program and associated budgets.

FINANCIAL DETAILS

Funds for the costs related to this purchase are available in the TRCA land acquisition capital account.

RES.#B73/20 -

REQUEST FOR PERMANENT EASEMENT (1613935 ONTARIO INC.)

Request for Permanent Easement Required for Stormwater Infrastructure Town of Ajax, Regional Municipality of Durham, Duffins Creek Watershed (CFN 63820). Receipt of a request from 1613935 Ontario Inc., for a permanent easement required for stormwater infrastructure, located south of Taunton Road W. and west of Ravenscroft Road, in the Town of Ajax, Regional Municipality of Durham, Duffins Creek watershed.

Moved by: Joanne Dies
Seconded by: Ronald Chopowick

THE EXECUTIVE COMMITTEE RECOMMENDS THAT WHEREAS the Toronto and Region Conservation Authority (TRCA) is in receipt of a request from 1613935 Ontario Inc. for a permanent easement required for Stormwater Infrastructure located south of Taunton Road W. and west of Ravenscroft Road, in the Town of Ajax, Regional Municipality of Durham, Duffins Creek watershed;

AND WHEREAS it is in the best interest of TRCA in furthering its objectives as set out in Section 20 of the Conservation Authorities Act to cooperate with 1613935 Ontario Inc. in this instance;

THEREFORE LET IT BE RESOLVED THAT a permanent easement containing 0.006 hectares (0.01437 acres), more or less, of vacant land, required for stormwater infrastructure, said land being part of Lot 12, Concession 3, designated as Part 1 on draft plan of survey prepared by J.D. Barnes Ltd., Reference No: 18-25-563-02, File: G:\18-25-563\02\18-25-563-02.dgn, in the Town of Ajax, Regional Municipality of Durham, be conveyed to 1613935 Ontario Inc.;

THAT consideration be \$28,600; all legal, survey and other costs to be paid by 1613935 Ontario Inc.;

THAT 1613935 Ontario Inc. fully indemnify TRCA from any and all claims from injuries, damages or costs of any nature resulting in any way, either directly or indirectly, from this conveyance or the carrying out of construction;

THAT an archaeological investigation be completed, with any mitigation measures being carried out to the satisfaction of TRCA staff, at the expense of 1613935 Ontario Inc.;

THAT a permit pursuant to Ontario Regulation 166/06, as amended, be obtained by 1613935 Ontario Inc. prior to the commencement of construction;

THAT all TRCA lands disturbed by the proposed works be revegetated/stabilized following construction and where deemed appropriate by TRCA staff, a landscape plan be prepared for TRCA staff review and approval in accordance with existing TRCA landscaping guidelines, at the expense of 1613935 Ontario Inc.;

AND FURTHER THAT authorized TRCA officials be directed to take the necessary action to finalize the transaction, including obtaining any necessary approvals and the signing and execution of documents.

CARRIED

BACKGROUND

1613935 Ontario Inc. has requested a permanent easement across TRCA-owned lands required for stormwater infrastructure to the adjacent development to the east, located south of Taunton Road W. and West of Ravenscroft Road.

The subject TRCA-owned lands were acquired from 1613935 Ontario Inc. on February 22, 2010 under the Greenlands Acquisition Project 2010-2015 for a nominal fee.

Attachment 1 is a sketch illustrating the location of the permanent easement. **Attachment 2** is an orthophoto illustrating the location of the permanent easement.

RATIONALE

1613935 Ontario Inc. has conveyed 11.48 hectares (28.36 acres) of lands to TRCA for nominal consideration and has requested that TRCA granted a permanent easement of 0.006 hectares (0.01437 acres) over a small portion of the same lands now.

Relationship to Building the Living City, the TRCA 2013-2022 Strategic Plan

This report supports the following strategy set forth in the TRCA 2013-2022 Strategic Plan:

Strategy 4 – Create complete communities that integrate nature and the built environment

FINANCIAL DETAILS

1613935 Ontario Inc. has agreed to assume all legal, survey and other costs involved in completing this transaction. It is proposed that the unrestricted easement fees be utilized as TRCA considers proper, in the pursuit of furthering its mandate.

RES.#B74/20 -

REQUEST FOR PERMANENT EASEMENT (CITY OF TORONTO)

Request for a Permanent Easement required for replacement of Tobermory Culvert. City of Toronto, Humber River Watershed (CFN 63842). Receipt of a request from the City of Toronto for a permanent easement to support replacement of the Tobermory Culvert as part of the Finch West Light Rail Transit (FWLRT) Project, in Derrydowns Park, west of Tobermory Drive, South of Finch Avenue West, City of Toronto, Humber River Watershed.

Moved by: Jack Heath
Seconded by: Anthony Perruzza

THE EXECUTIVE COMMITTEE RECOMMENDS THAT WHEREAS Toronto the Region Conservation Authority (TRCA) is in receipt of a request for a permanent easement on TRCA owned lands located in Derrydowns Park west of Tobermory Drive, South of Finch Avenue West, in the City of Toronto, to support replacement of the Tobermory Culvert, that is part of the Finch West Light Rail Transit (FWLRT) Project, Humber River watershed;

AND WHEREAS it is in the best interest of TRCA in furthering its objectives as set out in Section 20 of the *Conservation Authorities Act* to cooperate with the City of Toronto in this instance;

THEREFORE LET IT BE RESOLVED THAT a permanent easement containing 0.13 hectares (0.32 acres) more or less, required for a culvert replacement and associated infrastructure, said lands being Parts 1 and 2 on a draft reference plan prepared by City of Toronto, Engineering and Construction Services, Engineering Support Services, job no. 2018-04478, plan no. 3 in the City of Toronto be granted in favour of the City of Toronto;

THAT consideration be the nominal sum of \$2.00 and all legal, survey and other costs to be paid by the City of Toronto;

THAT the City of Toronto is to fully indemnify TRCA from any and all claims from injuries, damages or costs of any nature resulting in any way, either directly or indirectly, from this conveyance;

THAT an archeological investigation will be completed, with any mitigation measures being carried out to the satisfaction of TRCA staff, at the expense of the City of Toronto;

THAT a permit pursuant to Ontario Regulation 166/06, as amended, be obtained by the City of Toronto prior to the commencement of construction;

AND FURTHER THAT authorized TRCA officials be directed to take the necessary action to finalize the transaction, including obtaining any necessary approvals and the signing and execution of documents.

CARRIED

BACKGROUND

The City of Toronto has requested a permanent easement on TRCA-owned lands, located in Derrydowns Park west of Tobermory Drive, south of Finch Avenue West, in the City of Toronto, for the replacement of the Tobermory Culvert.

Derrydowns Park is owned by TRCA and under a management agreement with the City of

Toronto. There is an existing culvert for Black Creek West Tributary under Finch Avenue West and exiting onto Derrydowns Park. As part of the Metrolinx FWLRT Project, the Tobermory Culvert is being replaced. The nature and scope of the existing easement does not sufficiently address the replacement culvert and its associated infrastructure, therefore an easement is necessary for the new culvert.

The subject TRCA-owned lands were acquired May 12, 1966 from Canday Holdings Limited and Brad-Jay investments Limited under P.8.A – Humber River Flood Plain Lands Project for \$7,288.

Attachment 1 is a sketch illustrating the location of the subject lands. **Attachment 2** is an orthophoto illustrating the location of the subject lands.

RATIONALE

The City of Toronto has conveyed lands to TRCA over the years for nominal consideration (\$2.00) and has requested that the permanent easement on TRCA land required for the new Tobermory Culvert be conveyed for a nominal consideration of \$2.00.

All lands disturbed by construction will be restored by Metrolinx in accordance with TRCA's Voluntary Project Review (VPR) process.

Relationship to Building the Living City, the TRCA 2013-2022 Strategic Plan

This report supports the following strategy set forth in the TRCA 2013-2022 Strategic Plan:
Strategy 4 – Create complete communities that integrate nature and the built environment

FINANCIAL DETAILS

The City of Toronto has agreed to assume all legal, survey and other costs involved in completing this transaction.

Section II – Items for Executive Action

RES.#B75/20 - REQUEST FOR PROPOSAL FOR VENDORS OF RECORD FOR THE SUPPLY AND DELIVERY OF BULK PROPANE AND RELATED SERVICES

Award of Request for Proposal (RFP) No. 10033496 for establishment of a Vendors of Record (VOR) arrangement for the Supply and Delivery of Bulk Propane and Related Services.

Moved by: Paul Ainslie
Seconded by: Anthony Perruzza

WHEREAS Toronto and Region Conservation Authority (TRCA) is engaged in projects and facility operations that requires the supply and delivery of bulk propane and related services;

AND WHEREAS TRCA solicited proposals through a publicly advertised process and evaluated the proposals based on the criteria;

LET IT BE RESOLVED THAT TRCA staff be directed to establish a Vendor of Record (VOR) arrangement with Superior Propane, Parkland Fuels Corporation o/a Sparlings Propane and Armstrong Propane Limited for the supply and delivery of bulk propane and related services for a three (3) year period with an option to extend for one (1) additional year;

AND FURTHER THAT authorized TRCA officials be directed to take whatever action may be required to implement the contract, including the obtaining of necessary approvals and the signing and execution of any documents.

CARRIED

BACKGROUND

TRCA currently operates administrative office facilities, education field centers, conservation park areas, residential rental properties, and restoration/construction sites. These facilities are operated using a variety of fuel sources based on their geographical location. Some of these facilities/sites require heating, cooling, and cooking operations to be fueled by bulk propane.

TRCA requires the supply and delivery of bulk propane and related services for heating of mobile construction site office trailer/containers, heating systems of residential rental properties, and facility/water heating and or cooking operations for educational field centres. By establishing a VOR arrangement for supply and delivery of bulk propane and related services, vendors are authorized to provide these goods and/or services for a defined period of time and with fixed pricing.

Staff may contact a vendor on the list to provide bulk propane and related services on an as and when needed basis based on their geographic location and with a value up to \$15,000 per facility/project site per year. Services above the \$15,000 threshold for a facility/project site are subject to TRCA's Procurement Policy. Vendors will be required to provide all resources required to service the divisional or program needs in accordance with applicable laws, codes, standards, terms and conditions of the VOR agreement. The VOR arrangement will be subject to annual review in order to confirm that the vendor(s) is/are providing an adequate level of service and to update any applicable insurance, certifications, or policies of the vendor(s).

RATIONALE

RFP documentation was posted on the public procurement website www.biddingo.com on July 22nd 2020 with a closing date of August 6th, 2020. There were no addendums issued during the advertised period. A total of four (4) proponents downloaded the RFP documents and three (3) submissions were received from the following vendors.

- Armstrong Propane Limited
- Parkland Fuel Corporation o/a Sparlings Propane
- Superior Propane

An evaluation committee comprised of staff from Restoration and Infrastructure, Education and Training, Parks and Culture and Property and Risk Management reviewed the proposals. The criteria used to evaluate and select the recommended Proponents included the following:

Rated Criteria	Weight
Proponents Information and Profile	10
Experience and Methodology	15
Scope of Work Capabilities	15
Sub-total	40
Pricing	60
Subtotal	60
Total Score	100

Proponents had the option to provide pricing for some or all of the services in order to fulfill a VOR arrangement with a minimum of two (2) proponents for each of the four (4) delivery / service zones within TRCA jurisdiction. Through the evaluation process it was determined that Armstrong Propane Limited, Parkland Fuel Corporation o/a Sparlings Propane and Superior Propane all met the qualifications and requirements of the RFP. Therefore, staff recommends the award of contract No. 10033496 to these vendors. Proponent's scores and staff analysis of the evaluation results can be provided in an in-camera presentation, upon request.

Relationship to Building the Living City, the TRCA 2013-2022 Strategic Plan

This report supports the following strategic priority set forth in the TRCA 2013-2022 Strategic Plan:

Strategy 7 – Build partnerships and new business models

FINANCIAL DETAILS

Based upon a review of previous years 2017-2019 operations, the anticipated costs for the requested goods and or services for the contract duration are approximately \$256,000 plus applicable taxes. An increase or decrease in workload and required services will have an impact on the value of this contract. All vendors on the VOR list understand both the potential cost and resource implications associated with changes in workload. The goods and or services will be provided on an as required basis, with no minimum guaranteed. Vendors may increase unit rates annually, to a maximum of the preceding year's Ontario Consumer Price index as published by Statistics Canada. Whereas propane fuel costs are to fluctuate with daily market index for the day in which fuel is delivered.

Funding is available through various TRCA Project and Program operating budgets.

Section III – Items for the Information of the Board

RES.#B76/20 - 2021 GENERAL AND CAPITAL LEVY UPDATE

An update on TRCA's preliminary 2021 General and Capital levies.

Moved by: Cynthia Lai
Seconded by: Paula Fletcher

IT IS RECOMMENDED THAT the 2021 General and Capital Levy Update be received.

CARRIED

BACKGROUND

Preliminary levies are prepared each year for submission to TRCA's partner municipalities. Staff meet with partner municipality staff throughout the year, as required by the budget processes and schedules that are set out by each participating municipality. Presentations are made to partner municipality staff and their respective committees and councils, as required.

At Executive Committee Meeting #3/20, held on May 1, 2020, Resolution #B18/20 was approved as follows:

IT IS RECOMMENDED THAT Toronto and Region Conservation Authority's (TRCA) 2021 preliminary municipal levy submissions for the regional municipalities of Durham, Peel and York, and the City of Toronto, be consistent with the anticipated 2021 operating and capital funding envelopes proposed for TRCA in the 2020 budget cycle;

THAT preliminary operating levy targets be set at: Durham Region 2.5%, Peel Region 3.2%, York Region 1.1% and City of Toronto at 8.6%;

AND FURTHER THAT TRCA staff be directed to submit the preliminary 2021 municipal estimates and multi-year funding requests to the regional municipalities of Durham, Peel and York, and the City of Toronto, in accordance with their respective submission schedules.

RATIONALE

TRCA has met budget targets set out by partner municipalities, for proposed levies. The proposed apportionments noted in the tables below reflect the allocations supported at regional staff levels and will be presented to their respective councils in early 2021.

Transfer Payments

The provincial transfer payments to conservation authorities must be matched with Levy. The 2021 budget includes a provision for Ministry of Natural Resources and Forestry (MNRF) transfer payments at an amount equal to \$399,692.

FINANCIAL DETAILS

Capital Levy Budget Summary

The 2021 capital levy request is a total of \$42.6 million, as follows:

Partner Municipality	2020 Capital Levy	Preliminary 2021 Capital Levy (May) \$	2021 Capital Levy (Today) \$	2021 Increase/ (decrease) (Vs. May) \$	2021 Change (Vs. May) %
DURHAM	1,114,821	1,232,971	1,127,171	(105,800)	(9.5%)
PEEL	17,118,500	17,589,500	17,584,600	-4,900	0.0%
TORONTO	24,825,000	18,449,300	18,230,400	(218,900)	(0.9%)
YORK	4,992,800	5,039,000	5,655,000	616,000	12.3%
TOTAL	\$48,051,121	\$42,310,771	\$42,597,171	\$286,400	0.6%

Regional Municipality of Durham

Durham Region budget guidelines were provided to TRCA on October 6, 2020, permitting operating budget increases of up to 2.5% and capital budget increases of up to 1.5%. 2021 guidelines are consistent with those of prior years.

TRCA initially requested a 2021 funding envelope that was 10.6% higher than then 2020 base. Rationale for this increase included inflation (2%) and the transition of core TRCA programs (Watershed Planning and Reporting, Regional Watershed Monitoring and Ecosystem Science) to a formula-based funding model that had been previously covered through contract services for specific Durham projects. This funding is distributed on a land area basis for programs that are jurisdiction wide. Durham Region has requested that TRCA submit a revised funding envelope that meets the Region's targets. As a result, the transition of core TRCA programs to a formula-based funding model has been deferred to 2022. TRCA is working with the Region to address the core requirements needed to continue to deliver key services across the jurisdiction and is preparing a resubmission for November 2020.

Regional Municipality of Peel

TRCA has requested a 2021 funding envelope that is 2.7% higher than then 2020 base, which is consistent with the 2020 targets contained in the 2020 submission. In early October, TRCA presented the 2021 budget submission to the Region of Peel's Executive Leadership Team. Region of Peel staff are supportive of the 2021 submission.

City of Toronto

TRCA initially requested a 2021 funding envelope that was 25.7% lower than then 2020 base to meet guidelines provided by City of Toronto staff. The decrease in 2021 funding is attributable to the reduction required for future segments of the Scarborough Waterfront Project; funding received in 2020 has supported detailed design activities and will be carried into fall 2021 for implementation of the West Segment. Additionally, the City of Toronto contributed \$3.862 million in 2020 as a one-time payment to TRCA's head office accommodation project to catch-up on three years of outstanding payments. TRCA submitted a revised 2021 funding envelope that is 1% lower than the May preliminary due to a correction in annual funding provided for TRCA's administrative office building to \$965,000. Administrative Review sessions are ongoing and City of Toronto staff will update TRCA as required.

Regional Municipality of York

TRCA has requested a 2021 funding envelope that is 13.3% higher than the 2020 base. The increase in funding is primarily driven by a request of York staff to enhance the 10-year funding for TRCA's Erosion Risk Management Program with \$613,000 proposed for 2021. TRCA presented the 2021 budget submission in late October to York's Executive Leadership Team, and staff were supportive of the 2021 submission at this time.

General Levy Budget Summary

General Levy is based on Current Value Assessment (CVA) and the apportionment is based on the most available property assessment levels for each participating municipality. The raw CVA factors are then modified by regulation and provided to each conservation authority by MNR, usually in the fall of each year. Due to varying assessment growth rates for each municipality there will occur minor changes in the annual allocations. Approximately 94% of TRCA's general levy is allocated using this approach. Approximately 3.5% of the levy is allocated using Authority policy with respect to property taxes, whereby the levy required to pay for taxes is charged back to the municipality where the property is located. The balance, or 2.5%, is an allocation based on "ability to pay" and is generally referred to as "non-CVA levy." This latter component is the adjustment to the levy that allows TRCA to meet varying annual levy guidelines from each partner municipality.

Each of TRCA's partner municipalities has its own unique budget requirements and annual budgetary pressures. TRCA has met each of the individual partner municipality's requirements. The 2021 general levy anticipates a provision, approximately \$1.084 million referred to as "Non-CVA Levy". The non-CVA levy adjusts the amount of the general levy that relates to maintenance costs that would otherwise be apportioned using CVA as the basis and allows TRCA to meet the unique funding guidelines of each participating partner municipality.

Partner Municipality	2020 Operating Levy	2020 % of Total Share	CVA Levy*	Municipal Property Tax Adjustment	Non-CVA Levy (Rate Adj.)	2021 Preliminary Operating Levy	2021 % of Total Share
ADJALA-TOSORONTIO	930	0.01%	919	-	-	919	0.01%
DURHAM	596,000	3.86%	418,908	95,249	99,843	612,000	3.76%
TORONTO	9,470,412	61.31%	9,513,497	5,288	679,127	10,197,912	62.59%
MONO	1,700	0.01%	1,185	501	-	1,686	0.01%
PEEL	1,920,355	12.43%	1,615,941	62,719	305,336	1,983,996	12.18%
YORK	3,458,490	22.39%	3,264,505	231,295	-	3,495,800	21.45%
Total	\$15,447,887	100.00%	\$14,814,955	\$395,052	\$1,084,306	\$16,294,313	100.00%

Partner Municipality	Preliminary 2021 Operating Levy (May Report)	Updated 2021 Operating Levy (Today)	\$ Change Increase/ (Decrease)	% Change Increase/ (Decrease)
ADJALA-TOSORONTIO	960	919	(41)	(4.3%)
DURHAM	614,000	612,000	(2,000)	(0.3%)
MONO	1,750	1,686	(64)	(3.7%)
PEEL	1,983,787	1,983,996	209	0.0%
TORONTO	10,286,300	10,197,912	(88,388)	(0.9%)
YORK	3,495,800	3,495,800	-	0%
TOTAL	\$16,382,597	\$16,292,313	(\$90,284)	(0.6%)

The 2021 preliminary general levy funding envelopes for the regional municipalities of Durham, Peel and York have been set at the amounts proposed in the multi-year targets for TRCA, and which approximate recent historical average increases. The City of Toronto's 2021 general levy includes an increased contribution of \$728,000 for the City's CVA catch-up repayment and does not include inflationary increases, resulting in a total general levy outlook of \$10,197,912 in 2021. At Executive Committee Meeting #3/20, held on May 1, 2020, the preliminary general levy was anticipated to be \$16,382,587, which included inflationary increases on the City of Toronto's base contribution and a higher inflationary increase to Durham. With inflationary increases removed from the City of Toronto's apportionment and the minimal reduction to Durham the resulting 2021 general levy is \$16,292,313.

With the City of Toronto adopting the previously proposed general levy catch-up strategy for 2020-2022, York Region is now the lone remaining upper tier municipality required to address this issue. In October 2020, a memo was sent to York Region staff detailing a potential option for a phase-in repayment over a three-year period, similar to the City of Toronto. TRCA will work with all partner municipalities to develop a consistent general levy strategy to mitigate the probability of this issue recurring in the future.

After considering all the factors that affect the general levy, including property tax adjustments, year over year shifts in CVA and individual partner municipality targets, TRCA is anticipating total general levy funding in the amount estimated at \$16,292,313 representing an potential increase over 2020 of 5.5%.

In anticipation of the upcoming *Conservation Authorities Act* and associated regulations, TRCA staff have initiated the process in identifying programs and services as mandatory (core) and non-mandatory (i.e., municipal or other programs and services) for budget planning purposes. On this basis, the below allocation of general levy by service area was approved at SLT meeting #9/20 on September 10, 2020. The 2021 internal allocation did not include any inflationary increases to over the 2020 general levy, resulting in a \$116,926 buffer over the 2021 preliminary general levy request to partner municipalities, which are currently allocated to Corporate Services. Staff will work with SLT to allocate these funds throughout the 2021 budget process that is currently underway. Funds will continue to be redirected towards core programs and services throughout 2021 and into the 2022 budget process. TRCA will transition partner municipality priority projects and programs that are not deemed to be core, to be delivered under Memorandum of Understanding agreements or Service Level Agreements at fully cost recoverable models.

General levy allocation to TRCA service areas is as follows:

Service Area (Program Areas)	Approved 2020 General Levy Budget	Proposed 2021 General Levy Budget	2021 Increase/ (Reduction)
Watershed Studies and Strategies	665,000	440,000	(225,000)
Water Risk Management	664,000	700,000	36,000
Regional Biodiversity	-	150,000	150,000
Greenspace Securement and Management	-	330,000	330,000
Tourism & Recreation	864,000	1,930,400	1,066,400
Planning & Development	935,000	1,530,000	595,000
Education & Outreach	1,679,000	840,000	(839,000)
Sustainable Communities	155,000	-	(155,000)
Corporate Services	10,486,554	10,372,580	(113,974)
Total	\$15,448,554	\$16,292,980	\$844,426

A detailed breakdown of general levy allocation by program area is available upon request.

Relationship to Building the Living City, the TRCA 2013-2022 Strategic Plan

This report supports the following strategy set forth in the TRCA 2013-2022 Strategic Plan:
Strategy 9 – Measure performance

DETAILS OF WORK TO BE DONE

Staff will bring forward a detailed 2021 budget document following all municipal council approvals. As required by regulation, TRCA will provide 30 days' written notice to its partner municipalities of the date of the meeting at which the Board of Directors will consider the levy for approval.

TRCA will continue to work with partner municipalities, including lower tier municipalities, to undertake contract services/special projects wherein TRCA has significant, specialized expertise. These engagements may include, but are not limited to, erosion work, construction of trails, bridges and wetlands, and tree planting. TRCA anticipates that contract services will continue to be an important aspect of organizational financial sustainability and growth, as changes to the *Conservation Authorities Act* and associated Regulations come forward.

RES.#B77/20 -

Q3 2020 MEDIA SUMMARY

Information report regarding Toronto and Region Conservation Authority's (TRCA) corporate media communication activities during the third quarter of 2020 (July – September).

Moved by: Cynthia Lai
Seconded by: Paula Fletcher

IT IS RECOMMENDED THAT the Q3 2020 Media Summary report be received.

CARRIED

BACKGROUND

The CEO's Office and Marketing and Events business units with involvement of program areas across TRCA's Divisions carry out corporate communications programs to provide TRCA with a unified voice that aligns consistently with strategic priorities, and monitors results to identify opportunities for improvements. Working with staff from all divisions and external program and service providers, the business units deliver communications campaigns through traditional media outlets and online media channels. Content is typically disseminated through materials such as news releases and media advisories, direct outreach to targeted journalists, producers and editors, and responses to incoming media inquiries. Digital campaigns involve posting of visual and written content on websites and distribution via social media platforms. All media activity is supported by ongoing assessment and deployment of technology tools and processes to maximize effectiveness. While TRCA produces communications materials for multiple programs and projects managed by business units across the organization, this report provided in **Attachment 1** focuses on notable media coverage during the reporting period.

For the Q3 Media Summary, here are some of the highlights:

1. Canadian Geographic did a feature story on July 21, 2020 about the important role Toronto's waterways play in annual salmon movement (called "salmon run"). TRCA staff provided valuable insights and comments.
2. The Flight of the Monarch Day (August 22, 2020), and specifically TRCA's activities, attracted very positive coverage from several outlets. The CBC was able to interview TRCA staff live at Tommy Thompson Park (while observing social distancing protocols).
3. The partial collapse of the Scarborough Bluffs on Sunday, August 23, 2020 attracted much media coverage the following day. TRCA staff were quick to reply and provided necessary information to the public.
4. On September 14, 2020, FCM sent a national press release and social media messages about TRCA's honourable mention as part of the annual Sustainable Community Awards.

Relationship to Building the Living City, the TRCA 2013-2022 Strategic Plan

This report supports the following strategy set forth in the TRCA 2013-2022 Strategic Plan:
Strategy 6 – Tell the story of the Toronto region

DETAILS OF WORK TO BE DONE

TRCA is preparing a Communications Plan to ensure more streamlined and strategically focused media relations that will guide our approach in working with media.

TRCA is creating media relations / briefing documents and sessions to be able to prepare staff to speak to media in a consistent manner with consistent messaging.

TRCA continues to engage / target media outlets on stories that are unique to the organization and its mandate.

Attachment 1: Notable TRCA Media Coverage: July - September 2020

Attachment 1: Notable TRCA Media Coverage: July – September 2020

During the third quarter of 2020, TRCA media coverage focused on the following (select examples of media coverage):

July 2020

Canadian Junior Golf Association, July 17, 2020

Full article: <https://www.cjga.com/bathurst-glen-golf-course-becomes-the-home-of-the-canadian-junior-golf-association/>

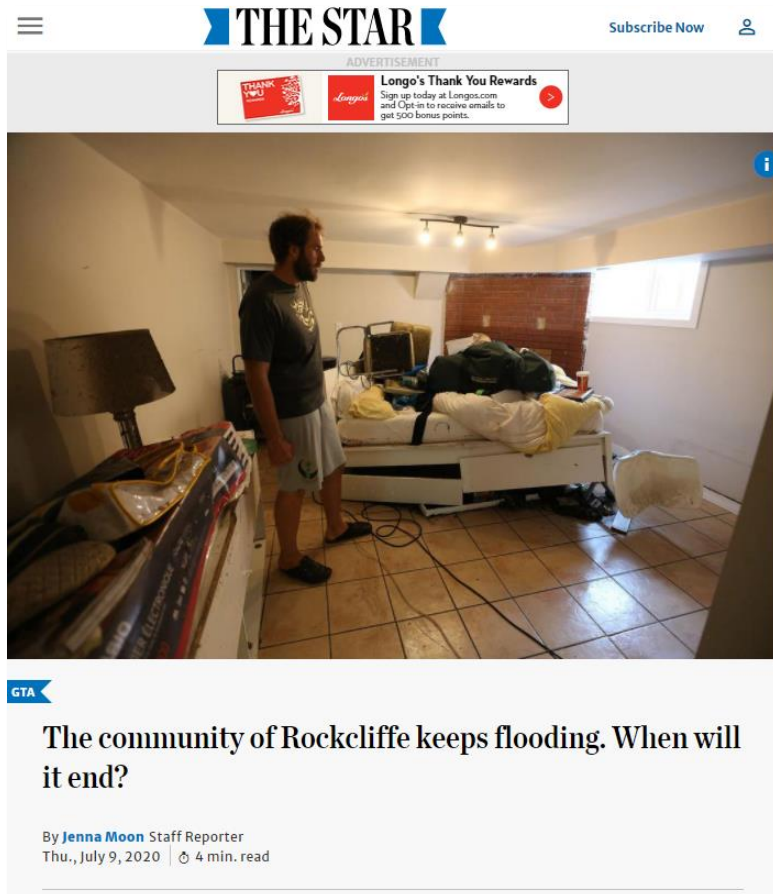

Richmond Hill, ON (July 17, 2020) – The Canadian Junior Golf Association (CJGA) is pleased to announce a partnership with Toronto and Region Conservation Authority (TRCA) through Bathurst Glen Golf Course which has become the Association's new home. The CJGA will also be partnering with the David Fritz Golf Academy who will be conducting camps, clinics, and leagues for our youth, as well as adults (parents and friends of the CJGA).

The CJGA and TRCA recognize the future of our country lies with our youth, as our future voters, purchasers, employees, executives, and partners. Their success will be determined by the

efforts we make today to develop their character, maturity, and personal growth, enabling them to take their rightful place in a highly competitive international environment.

The community of Rockcliffe keeps flooding. When will it end?

By **Jenna Moon** Staff Reporter
Thu., July 9, 2020 | 4 min. read

The flooding happened fast. Within half an hour, Eric Swanson's basement was submerged. His tools were destroyed, the contents of his basement are now waterlogged. In her basement bedroom, Swanson's daughter, 15-year-old Harper, noticed the water rising and darted out a back exit.

"She actually had to run out the back door because the water was coming into the front and we couldn't open her bedroom door anymore," Swanson told the Star by phone Thursday morning. While it "wasn't a life or death situation" — she had an exit available — Swanson said he was glad Harper was able to think fast.

The effects of Wednesday's sudden downpour — when around 65 millimetres of rainfall poured over the city of Toronto — may

have been a surprise to some but they were not a surprise to Swanson or their neighbours.

The community near Jane Street and Eglinton Avenue West is no stranger to the effects of heavy rains: In July 2013, the area suffered a flood following a torrential downpour. The area was also affected by flash floods after an August 2018 ninja storm blasted Toronto with rain for several hours. In 2005, flooding destroyed a culvert on Finch Ave.

Full article: <https://www.canadiangeographic.ca/article/salmon-city>

Yonge Street, University Avenue, and Bloor Street are all popular roads entangled in the busy city of Toronto. Used by citizens as transportation routes, these roadways are a constant bustle of activity.

Toronto's river system is also used as a heavy traffic route — by salmon. The river system in the city is made up of numerous man-made and natural waterways, from the Don to the Humber River. These water highways dominate a large part of the city, and one of their more frequent voyagers is salmon.

Every fall, thousands of coho and chinook salmon perform a salmon run, leaving Lake Ontario and making their way up the river system to find

spawning grounds. They try to get as far north as they can to find cold water and gravel, appropriate for them to spawn in and lay eggs.

Rick Portiss, senior manager of Aquatic Monitoring and Management for the Toronto and Region Conservation Authority (TRCA) says that Toronto's waterways are integral to the salmon's life cycle.

"They are just as important as they have ever been," he says.

The salmon's ability to get to their destination, however, can sometimes be a challenge.

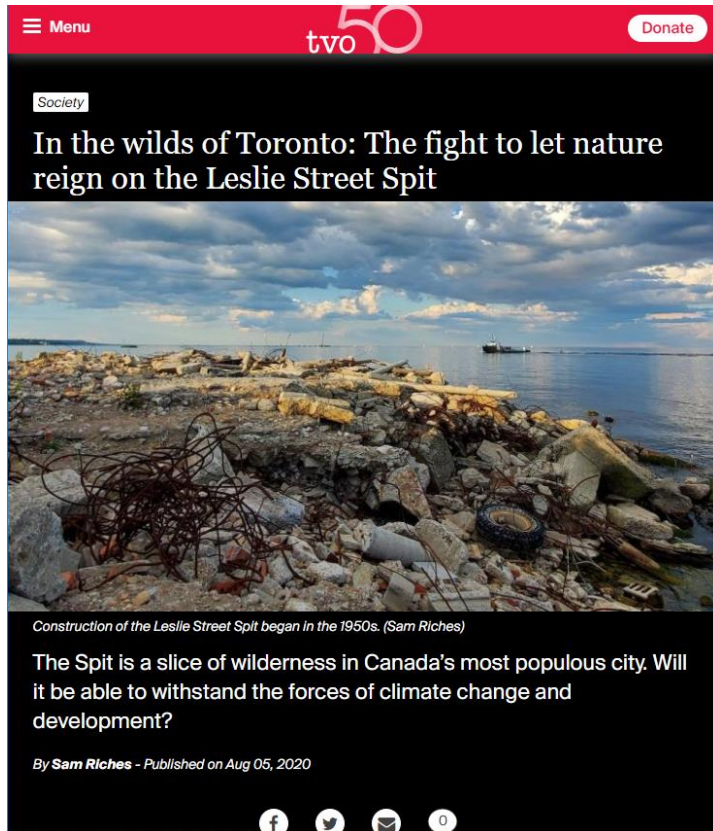

Implemented to help mitigate flooding after Hurricane Hazel in 1954, weirs (low dams used to regulate water flow) were placed in the Humber River to control erosion and manage water levels. These weirs became barriers for the salmon, preventing them from moving upstream.

August 2020

TVO, August 5, 2020

Full article: <https://www.tvo.org/article/in-the-wilds-of-toronto-the-fight-to-let-nature-reign-on-the-leslie-street-spit>

At the southern tip of Leslie Street, in Toronto's east end, you'll find a 250-hectare headland — from above, it resembles a skeletal hand reaching five kilometres out into Lake Ontario. From the ground, looking out toward choppy waters, you may feel as if you're somewhere remote or far-flung. Instead, you're just a few minutes from the downtown core of Canada's most populous city.

The Outer Harbour East Headland is home to more than 300 bird species, 50 butterfly species, and rich and varied vegetation and landscapes. School children are bused in to learn in outdoor classrooms, where they can spot turtles soaking up the sun, a coyote loping off into the bush, rabbits scurrying along the path, or a roost of fluttering monarchs. In the winter, you might see a great horned owl take flight and then silently disappear. While it is not, geologically speaking, a sandspit, most visitors

affectionally call it the Leslie Street Spit.

OPINION

Minister's Zoning Orders A Threat To Good Planning, Local Democracy

Former Ajax mayor Steve Parish, Environmental Defence's Tim Gray say they 'are being used on a routine and growing basis'

By **Steve Parish, Tim Gray** Ajax News Advertiser
Thursday, August 6, 2020

There is a troubling trend developing in Ontario that could have serious implications for agriculture, local community input, infrastructure costs and efficient land-use planning that protects the natural environment.

Ontario's city and town planning regime is generally acknowledged as one of the best in North America. The province's regime dates back to the passing of the first Planning Act shortly after the Second World War, and evolved over the past three generations. It is based on local

There is a troubling trend developing in Ontario that could have serious implications for agriculture, local community input, infrastructure costs and efficient land-use planning that protects the natural environment.

Ontario's city and town planning regime is generally acknowledged as one of the best in North America. The province's regime dates back to the passing of the first Planning Act shortly after the Second World War, and evolved over the past three generations. It is based on local decision making by elected municipal councils guided by professional planners and sound long-term policies. And it ensures ample opportunity for robust public

input.

But this well-functioning planning regime is threatened by the over-use of Minister's Zoning Orders. A Minister's Zoning Order is a tool that can be used by the provincial minister of municipal affairs to completely override the planning process and allow zoning and building to go forward by the stroke of a pen without these safeguards.

Traditionally, a Minister's Zoning Order has been used very sparingly and usually only where municipal structures don't really exist for rezoning, to allow key employment developments that could otherwise be lost without an expedited process, or to address some emergency situation -- for example, when the Elliot Lake mall collapsed and the community was left without a grocery store.

But no more.

Toronto

Worries grow following 'dramatic' drop in monarch butterfly population

Saturday declared 'Flight of the Monarch Day' in Toronto as awareness spreads

Julia Knope · CBC News · Posted: Aug 23, 2020 4:00 AM ET | Last Updated: August 23

The epic 5,000-kilometre migration of monarch butterflies from eastern Canada to the forests of central Mexico begins in late August each year. Events took place across Canada on Saturday to raise awareness on how to curb the declining monarch population. (Monarch Watch)

It's a trend conservationists are all too familiar with: monarch butterfly numbers across North America have been slowly declining for 15 years.

But this year's decrease is an even greater cause for concern, with the population of the orange and black butterflies down by more than 50 per cent between the winters of 2019 and 2020.

"[It's] a dramatic drop," said Rachel Stewart, program manager for Monarch Nation, a program run by the Toronto and Region Conservation Authority (TRCA).

"Much as efforts to preserve and conserve monarch butterflies are increasing and to provide habitat ... it's clear that there's still a long way to go."

It wasn't always this bleak; between 2018 and 2019 there was an unusual spike, which turned out to be a one-year blip.

That's why Monarch Nation organized Flight of the Monarch Day Saturday in communities across Canada — events that raise awareness and support the continent-wide effort to stabilize the species' uncertain future.

Toronto's flagship event took place in Tommy Thompson Park, a narrow peninsula that sits on the waterfront, tucked between Cherry and Woodbine beaches.

The event marked one of the last opportunities this season to catch a glimpse of a monarch in the city. Viceroy butterflies, which are similar to monarchs but slightly smaller, could also be seen at the park.

Dramatic landslide video a reminder Scarborough Bluffs aren't safe: Officials

Jenny Yuen
Aug 24, 2020 • Last Updated 2 months ago • 2 minute read

The aftermath of a landslide is seen at the base of the Scarborough Bluffs in Toronto, Ont. on Monday August 24, 2020. PHOTO BY ERNEST DOROSZUK /Toronto Sun/Postmedia

A landslide at the Scarborough Bluffs on Sunday was captured on video showing the ridge collapsing and a dust cloud enveloping sunbathing crowds below.

The Toronto and Region Conservation Authority (TRCA) said the incident, which occurred just before 4 p.m., was the result of a massive boulder falling from above at the western end of Bluffer's Park.

Luckily, no one was injured, Toronto Police said.

"We tend to find these landslides happen in the rainier season, especially in the spring, just coming out of winter," said Matt Johnston, TRCA's senior manager of erosion risk management.

"We had a bit of rain, but we didn't have substantial quantities of it. As the bluffs are comprised mostly of sand, they look stunning and they

may actually look a bit more stable than they actually are.

"But you can have weathering of that material, which will cause these massive landslides to take place anytime."

Johnston said a significant landslide also took place the weekend prior at the Bluffs, when again, no one was hurt. He said these landslides are happening at various times along different stretches of the Bluffs.

Full article: <https://www.blogto.com/city/2020/09/east-don-trail-construction-toronto/>

The East Don Trail is about to reopen after two years of construction in Toronto

An asphalt trail running along the [East Don Trail](#) is near completion — part of it, anyway.

After two years of construction, Phase 2 of the East Don Trail will be open to the public sometime this month, says the [Toronto and Region Conservation Authority \(TRCA\)](#).

This phase of the new multi-use path stretches 1.4 kilometres long, and 3-4 metres wide, from the existing East Don Trail.

Connected by a new steel bridge, the extension now runs east from Wynford Heights all the way to Wigmore Park on Elvaston Drive.

A total of three permanent bridges now cross over the East Don River as part of

Phase 2, including the longest, a 60-metre bridge, that was implemented last year.

East Don Trail's lengthier Phase 1 will span from the Lower Don Trail and down to the Gattineau Trail and anticipated [Meadoway](#), the latter slated to be one of Canada's largest urban linear green spaces at 16-kilometres.

That phase isn't expected to be complete until spring 2021. The finish line also depends on a tentative tunnel and pedestrian overpass been proposed to suspend over the Metrolinx rail line. Construction on the project has been ongoing since September 2018, following an [Environmental Assessment](#) process that implemented a new policy: three trees planted for every one removed during construction.

The Federal government has invested up to \$11.25 million for the project, with the Toronto government matching that amount.

September 2020

Region of Peel, September 14, 2020

Full article:

<https://peelregion.ca/news/archiveitem.asp?year=2020&month=8&day=14&file=2020814.xml>

New electric vehicle charging stations available at Southfields Community Centre

Charging stations are the first of 43 to be built in the region from a Natural Resources Canada grant

BRAMPTON, ON (Sept. 14, 2020) Caledon Mayor Allan Thompson, Brampton Councillor Harkirat Singh, Mississauga Councillor Matt Mahoney, and Interim Commissioner of Peel Public Works and Chair of the Peel Climate Change Partnership Andrew Farr, joined Brampton East MP Maninder Sidhu to officially open seven new publicly available electric vehicle (EV) charging stations at Southfields Community Centre in Caledon. The EV charging stations were made possible through Natural Resources Canada's (NRCan's) [Zero Emission Vehicle Infrastructure Program \(ZEVIP\)](#).

Today the transportation sector accounts for approximately 25% of Canada's greenhouse gas (GHG) emissions, with light-duty vehicles accounting for about 12% of those national emissions. Electric vehicles are an integral part of Canada's plan to exceed its target of reducing GHG emissions 30 per cent by 2030. Part of achieving this goal includes encouraging Canadians to purchase zero-emission vehicles, requiring a reliable network of EV charging stations.

"These new EV charging stations are a positive step forward in expanding the needed infrastructure network

throughout the region," said Andrew Farr, Interim Commissioner of Public Works at the Region of Peel and chair of the Peel Climate Change Partnership (PCCP). "By working together, the members of the PCCP were able to qualify for the ZEVIP funding, allowing each organization to make strides towards achieving a Low Carbon Community."

The PCCP is made of the Region of Peel, City of Brampton, Town of Caledon, City of Mississauga, Toronto and Region Conservation Authority (TRCA) and Credit Valley

Full article: <https://fcm.ca/en/news-media/gmf/announcing-2020-sustainable-community-award-winners>

FCM's Sustainable Communities Awards celebrate the most innovative environmental initiatives in Canadian cities and communities of all sizes. Through these awards, FCM recognizes and celebrates sustainability leaders and trailblazers in municipalities across Canada.

The awards, delivered by FCM's Green Municipal Fund (GMF), showcase outstanding municipal projects in asset management, brownfields, climate change, energy, transportation, waste, water, and sustainable neighbourhood revitalization and design.

Honourable mentions

Toronto and Region Conservation Authority and nine partner municipalities including:

City of Toronto, Regional Municipality of Peel, City of Brampton, City of Mississauga, Town of Caledon, Regional Municipality of York, City of Richmond Hill, City of Markham and City of Vaughan

Sustainable Neighbourhood Action Program

The Sustainable Neighbourhood Action Program (SNAP) is a neighbourhood model that helps municipalities retrofit older neighbourhoods and build community support and partnerships. Since its inception, the model has been adopted by multiple communities in Ontario and beyond, and focuses on solutions tailored to the local context for home retrofits, infrastructure renewal, neighbourhood revitalization and community resilience.

Section IV – Ontario Regulation 166/06, As Amended

RES.#B78/20 - APPLICATIONS FOR PERMITS PURSUANT TO ONTARIO REGULATION 166/06, AS AMENDED

Development, Interference with Wetlands and Alterations to Shorelines and Watercourses. Pursuant to Ontario Regulation 166/06, as amended, written permission from the Authority is required for:

- a) straightening, changing, diverting or interfering in any way with the existing channel of a river, creek, stream or watercourse, or for changing or interfering in any way with a wetland;
- b) development, if in the opinion of the Authority, the control of flooding, erosion, dynamic beaches or pollution or the conservation of land may be affected by the development.

A permit may be refused through a Hearing Process, if in the opinion of the Authority, the control of flooding, erosion, dynamic beaches, pollution or the conservation of land is affected.

Moved by: Paul Ainslie
Seconded by: Jack Heath

THAT permits be granted in accordance with Ontario Regulation 166/06, as amended, for the applications 10.2 – 10.6, which are listed below.

CARRIED

PERMIT APPLICATIONS 10.2 – 10.6 ARE MAJOR APPLICATION - REGULAR

Applications that involved a more complex suite of technical studies to demonstrate consistency with policies; applications that cover a significant geographic area (e.g. subdivisions, stormwater management ponds), extensive modifications to the landscape, major infrastructure projects, emergency infrastructure works, resolution of violations/after the fact permits, trail construction.

CITY OF MISSISSAUGA

10.2 IMPERIAL OIL LIMITED

To construct, reconstruct, erect or place a building or structure, site grade and interfere with a wetland along the hydro corridor north of Eastgate Parkway, from Highway 403 to Fieldgate Drive, in the City of Mississauga, Etobicoke Creek Watershed as located on the property owned by Hydro One/Infrastructure Ontario; the Ministry of Government and Consumer Services; the City of Mississauga and the Regional Municipality of Peel. The purpose is to replace the existing 63 km Sarnia Products Pipeline (SPPL) from the City of Hamilton (Waterdown Station) to the terminal storage facility in Toronto's North York area. Work within TRCA's jurisdiction has been divided into 6 separate permit applications (CFN's 61878, 61879, 61880, 61881, 61882, 61883). This application (CFN 61878) includes the replacement of an existing 12-inch diameter pipeline along the hydro corridor north of Eastgate Parkway, from Highway 403 to Fieldgate Drive, in the City of Mississauga.

CFN: 61878 - Application #: 0783/19/MISS

RES.#B79/20 - DELEGATED PERMITS

Moved by: Paul Ainslie

Seconded by: Jack Heath

THAT standard delegated permits, permission for routine infrastructure works, and minor works letter of approval granted by Toronto and Region Conservation Authority staff, in accordance with Ontario Regulation 166/06, as amended, which are listed below, be received.

CARRIED

10.1

DELEGATED PERMITS - FOR RECEIPT– STAFF APPROVED AND ISSUED

Delegated Permits are processed by Development and Engineering Services Division staff, authorized by designated staff appointed as Enforcement Officers by the Board of Directors and received monthly by the Executive Committee. Delegated permits are categorized as standard, routine infrastructure works, emergency infrastructure works, minor works and permits after the fact/resolution of violations.

STANDARD DELEGATED PERMITS FOR RECEIPT– STAFF APPROVED AND ISSUED

Standard delegated permits are non-complex permissions consistent with TRCA approved policies and procedures and issued for a time period of two years or less.
