#### EXECUTIVE SUMMARY

#### STRATEGIC UPDATE OBJECTIVES

The TRCA is updating the *Partners in Project Green Strategy* to ensure that program goals, targets and initiatives are meeting the evolving needs of its stakeholders. The strategy review process sought to:

- I. Measure success and areas for improvement in Partners in Project Green program delivery
- II. Review targets to ensure they are realistic and aligned with the goals of the Program
- III. Evaluate program value proposition for the business community and Steering Committee members
- IV. Identify new revenue generating opportunities for the program

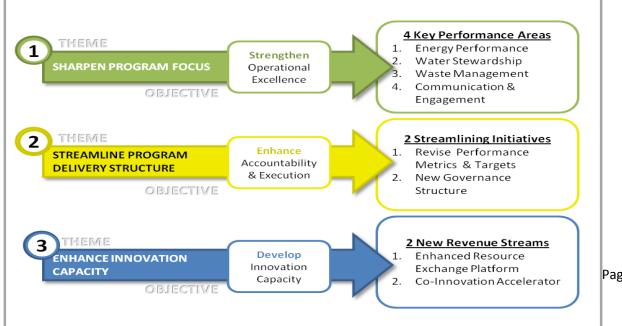

#### OPPORTUNITIES TO STRENGTHEN, DEVELOP & STREAMLINE PROGRAMMING

The strategy update process reaffirmed that *Partners in Project Green*'s core value proposition remains relevant to program constituents. Despite awareness of and engagement in sustainability having grown significantly since program inception, *Pearson Eco-Business Zone* members continue to express a desire for supplemental support, although in areas that have evolved since program inception. Having established itself as a trusted resource for sustainability best practices, relationship brokering, and coordinating multistakeholder initiatives, *Partners in Project Green* is well positioned to continue playing a valuable support role for enhancing performance and innovation in individual firms and the region as a whole.

The review process has underscored several areas for improvement that will help ensure the Program's strengths and resources are more efficiently and effectively leveraged to meet evolving needs. Strategic and tactical recommendations contained in this report focus on:

- 1. **STRENGTHENING** effectiveness of program mix in driving sustainable operational excellence and sustainable innovation
- 2. STREAMLINING program delivery structure to enhance accountability and execution
- 3. **<u>DEVELOPING</u>** new capacity for advancing sustainability innovation and generating new revenues

#### OVERVIEW OF PRIMARY RECOMMENDATION AREAS

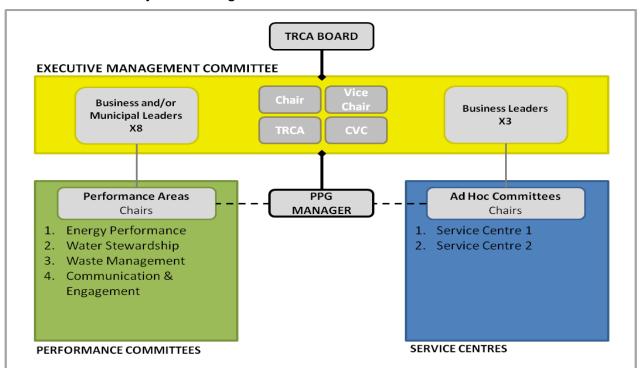

Page | 4

#### PROGRAM DELIVERY STRUCTURE

Implementing the vision and activities detailed in this strategy update will be facilitated through amendments to program delivery and management structures. Below are highlights of proposed modifications to roles and responsibilities of key program stewards aimed at empowering contributors to apply their diverse skill sets more effectively, be more accountable to achieving program results, and derive greater value from their participation in *Partners in Project Green*.

- **Executive Management Committee:** Expanded original Executive Committee membership and roles to more engaged business leadership.
- **Steering Committee:** Merged with Project Teams and enhanced for sector specific engagement and leadership through new Performance Committees.
- Project Teams: Merged with Steering Committee to form new Performance Committees.
- **Performance Committees (Formerly "Project Teams"):** More fluid engagement and targeted participation to aid program deployment and pursuit of targets.
- Core Program Staff: Heightened focus on providing consistent and focused Community
   Engagement & Marketing, Member Engagement, Knowledge Management & Reporting support to
   drive operational excellence across all program initiatives.
- **New Service Centres:** New division requiring dedicated support structure and relationships to deliver expertise, client pipelines and execution capacity required to support envisioned mandates.

#### **Revised Partners in Project Green Organizational Structure**

# **SUMMARY OF RECOMMENDED ACTIONS**

Key recommendations and supporting actions emerging from this review include:

| Re                     | commended Actions   | Approach Highlights   |  |
|------------------------|---|---|--|
| 1.                     | Sharpen Program Focus   | Shift from focus on Subject Areas to <u>Performance Areas</u> that emphasize <u>business outcomes</u> over environmental topics.  |  |
|                        | a. Streamline Programs  | Streamline program roster with an emphasis on helping partner companies <u>operationalize sustainability</u> in key performance areas and adopt <u>innovative processes and technologies</u> with minimal risk. |  |
| 2.                     | Streamline Program Delivery Structure   | Clarify responsibilities of specific program stewards, and ensure relevant metrics are employed to drive accountability.  |  |
|                        | a. Re-Design Program Metrics  | Reframe metrics under a new system of <u>Performance Metrics</u> .  |  |
|                        | b. Reshape Governance<br>Structure  | Through modified roles, empower contributors to apply divers skill sets more effectively, be more accountable to achieving program results, and derive greater value from participation.                        |  |
| scale with the support |   | ,   |  |
|                        | a. Conduct "Resource Exchange Platform" Feasibility Study  Strengthened <u>open-innovation</u> platform to college and facilitate resource (tangible & intangible) in the region. |   |  |
|                        | b. Conduct "Co-Innovation<br>Accelerator" Feasibility Study   | Collaborative framework to accelerate <u>sector-level</u> sustainability innovation that would be otherwise too risky, cost-prohibitive or inefficient to pursue.   |  |

#### 1. BACKGROUND

#### **OBJECTIVES OF STRATEGY REVIEW**

Approaching its fifth anniversary and conclusion of the *Partners in Project Green* Steering Committee's second term, TRCA is revisiting and updating the *Partners in Project Green Strategy* to ensure that goals, targets and programs of the initiative are meeting the evolving needs of its stakeholder community. As highlighted in **Figure 1**, analysis and recommendations contained in this report emerged through a strategic review process that has included a wide range of consultative efforts, which aimed to:

- I. Measure success and areas for improvement in Partners in Project Green program delivery
- II. Review targets to ensure they are realistic and aligned with the goals of the Program
- III. Evaluate program value proposition for the business community and *Steering Committee* members
- IV. Identify new revenue generating opportunities for the Program

Figure 1 – Stakeholder Consultation Process & Inquiry Areas

#### **STAKEHOLDER CONSULTATION VEHICLES**

- Stakeholder Interviews
- Executive Team Consultation
- Business Engagement Survey
- Business Community Charrette (Sept. 27)
- Steering Committee Charrette (Oct. 4)

#### **SAMPLE INQUIRY THEMES**

**New Ideas for Impact:** How can we address emerging business community needs by improving existing or creating new programming?

**New Ideas for Impact:** What program capabilities and structures should we cultivate to support program evolution? How might *Steering Committee* composition and roles be optimized for greater impact?

Business Community Charrette, Sept. 27, 2012

#### PEARSON ECO-BUSINESS ZONE EVOLUTION

Over the past half-decade, there has been an evolution in the breadth and depth of sustainability issues that companies in the *Pearson Eco-Business Zone* are engaging. Stakeholder consultations conducted for the *Partners in Project Green* strategic review revealed several themes in this regard, including:

- I. Employee Engagement/Transformation Still as Relevant as Ever: Sustainability engagement mindset has advanced, with organizations moving beyond building an understanding of sustainability and towards realizing concrete progress against goals. Educating and inspiring action from employees is still in high demand among community members.
- II. **Going Beyond Energy:** Whereas early sustainability efforts were largely centered around energy, company attention and investment has shifted towards other high-impact (from both a cost and environmental impact perspective) such as waste and water. These issues often have direct linkages to energy/emissions; however, dynamics for addressing each warrant tailored responses.
- III. **De-Risking Innovation:** There is strong support for the creation of vehicles that reduce adoption risks associated with new approaches for advancing sustainability.

Significantly, upon reflecting on the market's current capacity for and interest in sustainability, as well as the Program's historical successes and evolving capabilities, it is clear that *Partners in Project Green's* defining vision and core essence remain strongly relevant. As such, the recommendations contained in this report are less about making radical shifts to program direction, and more about capitalizing on opportunities to sharpen focus and respond both strategically and tactically to specific issues and community needs that have arisen since program inception.

#### Figure 2 – Partners in Project Green Vision & Essence

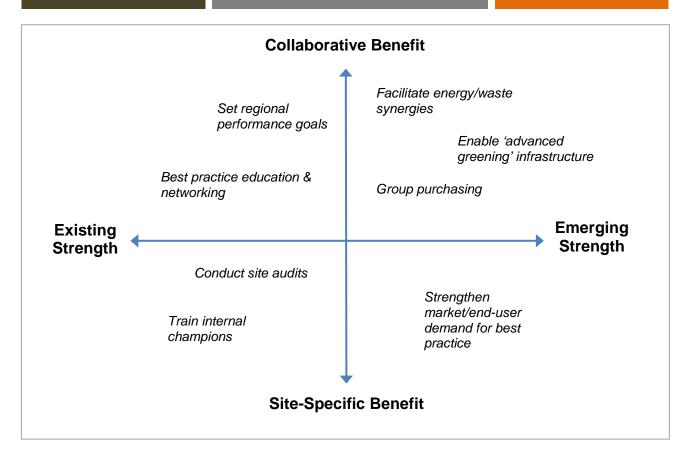

- <u>Pearson Eco-Business Zone Vision</u>: An internationally recognized community known for its *competitive, high performance* and *eco-friendly* business climate.
- <u>Partners in Project Green Essence</u>: A model for leveraging regional assets and proven best management practices to drive operational excellence in sustainability and unlock opportunities for cooperative advantage.

#### STAKEHOLDER CONSULTATION HIGHLIGHTS

After reflecting on existing activities and barriers to improvement in key issue areas, participants in the Sept. 27, 2012 *Business Community Charrette* outlined possible aspirational visions and specific opportunities for the Program to address key environmental impact areas, as summarized in **Figure 3**.

Figure 3 – Business Community Charrette Visioning & Opportunity Mapping Highlights

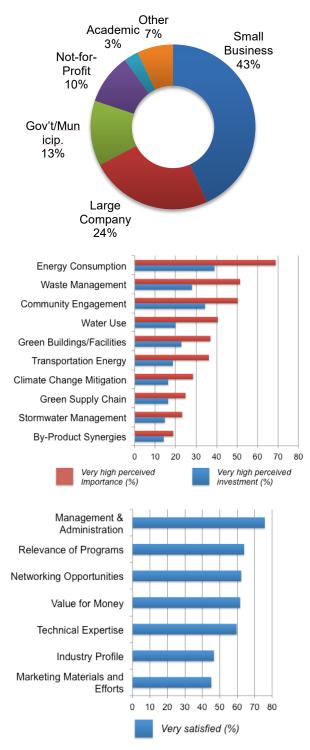

#### **ENERGY WATER BUILDINGS** "Become the most energy "Transform heavy users into "Enable infrastructure for cost-effective business water efficiency leaders..." advanced greening..." zone..." WASTE **TRANSPORTATION** SITE SUSTAINABILITY "Have zero-waste "Transform fleets into high-performing "Create zero-impact facilities by 2013..." sites..." environmental leaders..."

#### **BUSINESS COMMUNITY SURVEY FEEDBACK: KEY THEMES**

**Figure 4** provides highlights from the Partners in *Project Green Business Community* Survey. For more detailed results, please refer to supplementary presentation materials referenced in **Appendix A**.

Figure 4 – Business Community Survey Highlights

- 49% of respondents are PPG Ambassadors or have enrolled programs/ services in the last five years.
- Majority of organizations indicate clear commitment to sustainability, and upward trend in engagement.
- Majority of respondents very satisfied with their PPG experience.

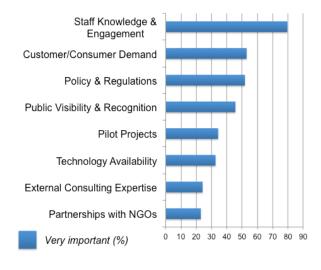

Energy, waste and community engagement issues rank highest in perceived importance to success

Q: Please indicate the degree to which your organization's success depends on + relative level of investments and resources dedicated to managing:

Strong program delivery track record & overall satisfaction with Partners in Project Green experience

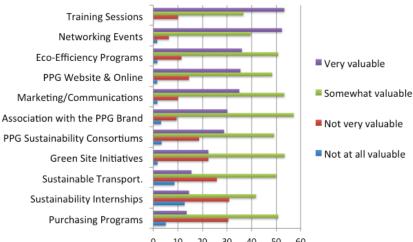

Q: Please indicate how satisfied you have been with the following aspects during your engagement with Partners in Project Green.

## Attachment 2: 2013 PPG Strategy Update

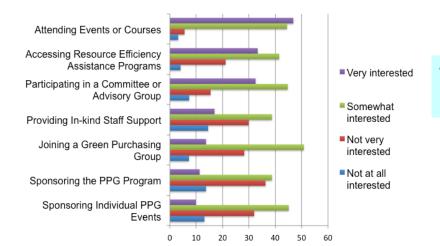

Capacity building & engagement, consumer demand, and policy environment seen as greatest drivers of improved environmental performance

Q: Please rate how important the following factors are for helping your organization improve its environmental performance.

Respondents are getting the most value out of training & networking events

Q: Please tell us how valuable the following Partners in Project Green resources are to achieving your sustainability goals.

Interest in continuing engagement with PPG through 'traditional' channels

Q: How would you rate your level of interest in engaging with Partners in Project Green in the following ways?

#### 2. PROGRAM ANALYSIS & EVALUATION

#### **ANALYSIS OF PROGRAM INVESTMENT EFFICIENCY**

Available data for analysis does not allow for a direct assessment of program spending required to support specific program engagement approaches. What can be analyzed, however, is the relative expense allocations directed to major project/program teams, as illustrated in **Figure 5**. When these figures are compared against the *relative order of importance* cited by respondents to the *Business Community Survey*, it appears that current investment allocations are consistent with needs being communicated in the marketplace.

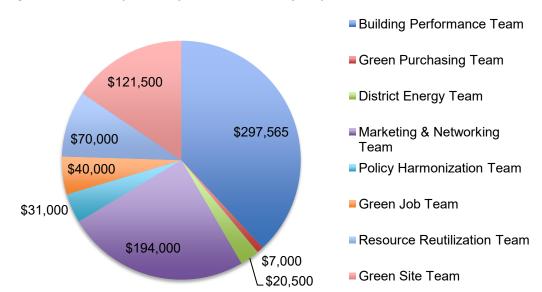

Figure 5 – 2012 Projected Expense Allocation by Project Team

Table 1 – Perceived Importance of Initiatives Based on Survey Rankings

| Training Sessions                     | 1  |
|---------------------------------------|----|
| Networking Events                     | 2  |

| Sustainable Transport. Initiatives    | 10 |
| Sustainability Internships            | 11 |

#### **ANALYSIS OF PROGRAM FOCUS AREAS & ACTIVITIES**

Partners in Project Green has built a solid reputation around being a growing community of businesses working together to green their bottom line by creating an internationally-recognized eco-business zone. The Program's strength has historically been focused on operational excellence for sustainability. That is, "helping businesses reduce energy and resource costs, uncover new business opportunities, and address everyday operational challenges in a green and cost effective manner."

#### **THEME:** Building on Existing and Emerging Competencies

As summarized in **Table 2**, the Program has cultivated both foundational and emerging competencies that can assist in defining future market engagement approaches. These competencies form the basis of program recommendations aimed at both reinforcing the core value proposition of *Partners in Project Green* (**Figure 2**), as well as exploring opportunities to expand value offerings through flagship initiatives that move beyond a focus on *operational excellence* to one focused on *coordinating and accelerating innovation*.

Table 2 – Partners in Project Green Competency Matrix

| FOUN | FOUNDATIONAL COMPETENCIES  |  |  |  |
|------|--|--|--|--|
| I.   | I. Knowledge Curating and disseminating quality research and best practices  Centre  |  |  |  |
| II.  | II. Cooperative Hub Facilitating cross-sector and inter-organizational collaboration enables opportunities for cooperative advantage |  |  |  |
| EMER | RGING COMPETENCI   | ES Control of the con |  |  |
| III. | Service Agent  | Delivering and monetizing services that bridge barriers to inter-<br>organizational cooperation to achieve regional environmental goals  |  |  |
| IV.  | Innovation<br>Driver   | Supporting uptake of next-generation solutions by mitigating cost, risk and policy barriers to sustainability innovation   |  |  |

#### **THEME: Aligning Focus Areas with Market Demand**

As illustrated in **Figure 6**, respondents to the 2012 Business Community Engagement Survey have highlighted a range of sustainability issues with high perceived importance to the success of their operations. While a number of these areas, such as *Energy Consumption* and *Community Engagement* represent historical strengths for *Partners in Project Green*, this stakeholder feedback also underscores the need to amplify value offerings in such emerging areas as *Waste Management* and "*Water Stewardship*.

Current PPG Competency (% of top box responses)

HIGH Energy Consumption

MODERATE Waste Management

HIGH Community Engagement

MODERATE Water Use

MODERATE Green Buildings

LOW Transport. Energy

Figure 6 - Aligning Focus Areas with Market Demand

#### **SECTION SUMMARY**

Given the diversity of issues underlying corporate sustainability, *Partners in Project Green* programs and activities have grown to encompass a wide range of both enduring and one-time initiatives. To leverage staff and funding resources most efficiently, *Partners in Project Green* can further sharpen its focus on executional excellence — consolidating and aligning its program mix around current priorities and sustainability support needs of *Pearson Eco-business Zone* members.

#### **OBJECTIVES: Sharpen Program Focus Areas & Activities**

- i. Sharpen thematic focus and minimize overlap between program activities.
- ii. Streamline environmental "Focus Areas" and "Impact Areas" based on existing strengths and market needs; reduce scope, but deepen impact and influence.
- iii. Better leverage program capabilities to target market gaps that *Partners in Project Green* is uniquely positioned to address, avoiding areas where other organizations have overlapping support resources.

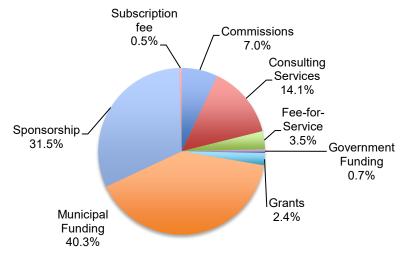

#### ANALYSIS OF REVENUE GENERATION POTENTIAL

Complementing *Partners in Project Green's* capacity for driving company productivity and competitiveness, are emerging opportunities to broach issues that require more pointed intervention and support to overcome structural market barriers. **Section 3.4** highlights two such areas that the Program is particularly well aligned to tackle, proposing specific recommendations for new "*Service Centres*" that target market gaps to action in these areas.

#### **THEME:** Understanding Program Reach & Fiscal Sustainability

This strategy update neither constitutes, nor should replace the need for an in-depth financial review of the program. Nevertheless, top-line analysis of historical/project financial performance does highlight important trends that have informed strategic recommendations. As summarized in **Figure 7**, approximately three quarters of *Partners in Project Green's* revenue is currently linked to municipal sponsorship and grant funding sources compared to consulting, fee-for-service, and commission sources that are projected to account for the remaining 25% of program revenue. Such sources – in particular, consulting services currently projected to account for 14% of revenues – are generally less dependable owed to difficulties in predicting market demand and securing firm client commitments.

Figure 7 – Projected 2013 Revenues & Sources

| \$74,000  |
|-----------|
|           |
| \$148,602 |
| \$37,000  |
|           |
| \$7,500   |
| \$25,000  |
| \$425,000 |
| \$332,000 |
| \$5,000   |
|           |

Program experience has also shown that participation — while amounting to a large audience of individuals and organizations — still only represents a relatively small share of the total *Pearson Eco-Business Zone* universe (see **Appendix B** for supplementary analysis). This is not surprising given how large and diverse the region is, and how resource intensive reaching and subsequently serving companies may be. Particularly given the fact that the majority of participants access *Partners in Project Green* programming at heavily subsidized rates, from the perspective of capturing greater

*economic value* from company interactions, focus should be given to finding higher leverage routes to generating revenues, as is described further in **Section 3**.

## **THEME: Market Gap for Sustainable Transformation Support**

This strategy review proposes new revenue-generating avenues for leveraging program relationships, brand equity and capabilities to fill market gaps for sustainable transformation within the *Pearson Eco-Business Zone*. The "Service Centre" model proposed in **Section 3.4** articulates specific sustainability issues that *Partners in Project Green* is well positioned to meet through its unique ability to coordinate cross-firm collaboration. While existing staff resources will provide strategic oversight and targeted support for the proposed service centres, the operating and accountability structure underpinning each centre will be distinct from conventional program management approaches. **Figure 8** clarifies the unique characteristics that differentiate this new class of arms-length, semi-autonomous initiatives from standard *Partners in Project Green* programs.

#### Figure 8 – Criteria for Service Centre Selection

- I. Targets high-leverage opportunities to deliver measurable results in support of key program performance areas.
- II. Provides a valuable service that commands fair monetary exchange for meeting unique user needs (i.e. cost reduction, risk reduction, access to specialized knowledge/capabilities etc.), whether in the form of user fees, commissions, or subscriptions.
- III. Offers the potential to be efficiently scaled-up that is: can enjoy economies of scale to achieve greater impact with minimal incremental investments in resources; can be applied to other environmental performance areas; or, can be replicated in outside jurisdictions.

#### **SPOTLIGHT: Partners in Project Green Revenue Generation Trends**

- While municipal funding will continue to be an important funding source for the project, Partners in Project Green will seek to increase self-generated revenue sources.
- Sponsorship will increasingly be an important source of funding moving forward. Increasingly
  sponsorships will be comprised of amounts garnered for project specific activities and training
  and networking events.
- Fee-for-Service revenues are anticipated to play a significant role in funding, generally through program-specific services delivery.
- Subscription fees have not been fully considered as a revenue source yet.

#### **SECTION SUMMARY**

Current *Partners in Project Green* revenue and expense forecasts paint a picture of an organization that has strong fiscal support from traditional partners, but also one that has not fully realized the potential to command market value for its value propositions. Specifically, the Program's current reliance on government funding sources (~40% of revenues) makes it susceptible to changes in public funding priorities. While there is currently strong support being provided by major sponsors (~30-40% of revenues), lower projections for commission and consulting revenues suggest that greater revenue diversification is important for shielding the Program against external factors beyond its control. This can be accomplished by amplifying self-generated revenue streams through flagship initiatives that strengthen the Program's ability to capture new user fees, while also offering a stronger value proposition for current and would-be sponsors.

#### **OBJECTIVES:** Enhance Value Proposition through new Service Centres

- i. Complement core *Partners in Project Green* programming with new "Service Centres" that address systemic barriers to large-scale environmental progress.
- ii. Ensure new offerings are designed to capture fair market value, structured as self-sustaining "profit centres," and are backed by strong sub-brands.

#### **ANALYSIS OF PROGRAM ACCOUNTABILITY & DELIVERY STRUCTURE**

Environmental metrics and targets introduced in the original *Partners in Project Green* strategy have been important for establishing the order of magnitude of environmental impacts in the region, setting baselines and designing programs and making investment decisions accordingly.

#### **THEME: Aligning Focus Areas with Market Demand**

Experience has shown that tracking progress against indicators currently being employed by *Partners in Project Green* staff and project stakeholders can be challenging. In addition to challenges associated with establishing clear linkages between official targets and ground-level program activities, tracking performance is often infeasible or impractical. **Figure 9** summarizes evaluation criteria employed in the review of official/current program metrics.

Figure 9 – Criteria for Partners in Project Green Target Re-Assessment

#### **THEME: Clarifying Partnership Relationships**

Partners in Project Green draws on a wide range of external partners to help carry out its mandate. To clarify how partnership relationships may be structured and leveraged, this section provides an overview of key "classes" of partnerships and corresponding roles. Note that the roles and responsibilities described are reciprocal; that is, at times Partners in Project Green may draw on the support of external groups to advance its mandate and programs, while at other times, the Program may serve to support outside groups/initiatives where there is added-value for constituents.

#### A. "Communications Partner"

- Identification Criteria:
  - o Complementary sustainable business objectives underpinning each organization
  - Respective programs/services provide add value to constituents, yet do not compete directly
  - o Access to a critical mass of companies/organizations in priority segments
- Sample Activities: Deliver information on programs through web media, event calendars and communications channels.
- Current Example: CaGBC

#### B. "Outreach Partner"

- Identification Criteria:
  - Organization offers programs with strong performance area alignment
  - Cross-promotion of program(s) may or may not entail referral fees
- Sample Activities: List as a "resource" on respective websites, and actively promote
  participation to members/constituents (i.e. via targeted mailing list drives/links to program
  registration)
- Current Example: Green Power Challenge

#### C. "Delivery Partner"

- Identification Criteria:
  - Program mandate is strongly aligned with key performance areas
  - o External partner may need assistance in delivering program or vice-versa
- Sample Activities: Partners in Project Green delivers program (for example, by hiring co-op students, managing program in conjunction with external partner etc.) or vice-versa if capacity gaps exist that can be more efficiently met by outside organization (terms and sharing of fees etc. to be negotiated case-by-case).
- Current Example: ChemTRAC

#### **THEME:** Eco-Business Zone Expansion Opportunities

Several GTA municipalities have expressed an interest offering Pearson Eco-Business Zone programs within their employments lands. The Partners in Project Green Policy Toolkit has also encouraged integration of eco-business policies and standards in municipal official plans to facilitate green business development in new employment lands. As a result, the strategy update process included discussions regarding the desirability and feasibility of replicating the Eco-Business approach beyond the existing *Pearson Eco-Business Zone* with support from TRCA Partners Municipalities. Models that have or are currently being explored to support expansion possibilities include:

- Expansion of Program offerings within GTA Seeking municipal and additional partner support to support Eco-business activities within the employment lands of other Regional municipalities within TRCA's Jurisdiction.
- II. **Brand Licensing** Creating operational efficiencies for external jurisdictions by sharing/codelivering *Partners in Project Green* programs (i.e. design, delivery and marketing) and technological infrastructure (i.e. web/back-end database platforms, *Service Centre* platforms), whereby the *Partners in Project Green* brand could be licensed to reflect common user experience and user platforms.
- III. **Eco-Business Zone Consulting -** Providing consulting support to assist outside jurisdictions in developing their own eco-business zone strategies and corresponding value offerings.

Such expansion pathways certainly represent an opportunity for future growth given the breadth of issues and actions addressed through this strategic update, furthermore, emerging relationships with regions like Durham and Caledon, offer valuable opportunities to sharpen understanding of the specific eco-business support needs of municipalities to help determine how *Partners in Project Green* can best address such needs in the future.

#### **SECTION SUMMARY**

This report contains recommendations for a significant rethink in how program indicators and targets are defined and managed. Specifically, to address ongoing challenges in linking program activities with progress against key targets, a new approach for orientating program management around performance metrics is introduced in **Section 3.3.** In addition, an underlying theme within this report is the need to clarify partnership parameters to ensure resources, capabilities and relationship assets between *Partners in Project Green* and its external partners are most efficiently and effectively leveraged. Finally, while this report does not recommend expanding *Partners in Project Green's* constituent base beyond traditional boundaries, it does acknowledge the opportunity to build internal consulting and management capacity to assist other jurisdictions in establishing their own eco-business zones, based on the Program's extensive experience and learning — an area which in the future may become a more active and visible revenue driver.

#### Attachment 2: 2013 PPG Strategy Update

#### **OBJECTIVES: Streamline Program Accountability & Delivery Structure**

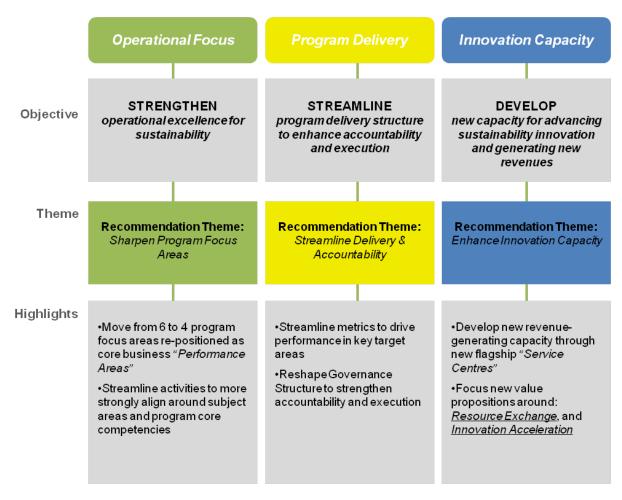

- i. Address historical/ongoing issues with monitoring and assessing project performance against program targets.
- ii. Realign metrics, targets and team accountability structure around proposed "Performance Areas."
- iii. Ensure *Governance body* roles more sharply leverage capabilities and provide more targeted value to participants.

# 3. KEY RECOMMENDATIONS & SUPPORTING ACTIVITIES

#### **OVERVIEW OF STRATEGIC RECOMMENDATIONS**

The recommendations detailed in this section, which have been developed in consultation with *Partners in Project Green* staff, are a response to insights gathered during stakeholder consultations phases of this strategy update. **Figure 10** highlights key objectives, themes and key recommendations proposed.

Figure 10 – Key Elements in Partners in Project Green Strategy Update

As highlighted in **Figure 11**, concepts for new activities are presented using a new "*Program Evaluation Dashboard Template*," which aims to clarify how program initiatives respond to current market drivers, program sustainability priorities, and existing/emerging organizational competencies. As a companion to more detailed project charters, this tool can be leveraged for a variety of purposes, including:

- i. **Program Evaluation:** Affirming strategic direction and relevance of existing programs and initiatives (individually or collectively).
- ii. **Ongoing Program Management:** Helping project teams maintain visibility to individual program goals and vision when managing performance ongoing.
- iii. **Program Ideation:** Strengthening focus on strategic objectives when devising new programs and initiatives.

Figure 11 – Proposed Program Evaluation Dashboard Template

| Dart   | Partners in Project Green - Program Evaluation Dashboard               |                                       |                     |                            |  |
|--|--|---------------------------------------|---------------------|----------------------------|--|

#### **ACTION #1: SHARPEN PROGRAM FOCUS**

This strategy focuses on sharpening *Partners in Project Green's* target areas and suite of activities to better support member businesses in achieving "sustainable operational excellence" and "sustainability innovation." Specifically, the newly articulated "Performance Areas" will ground a more targeted set of program activities aimed at focusing efforts to help partner companies a) operationalize sustainability in key performance areas, and b) adopt innovative processes and technologies with minimal risk.

In addition, as will be addressed in **Section 3.4**, unlocking opportunities for sustainability innovation at scale will be facilitated through a new "Service Centre" model that establishes infrastructure and transactional relationships that differ significantly from standard programming – and in doing so – creates new value for users, as well as new revenue possibilities for *Partners in Project Green*.

Please see **Appendix E** for additional information.

Figure 13 – Streamlining & Focusing Route to Impact through New Program Performance Areas

Page | 22

As summarized in **Table 3**, *Partners in Project Green* has mixed experience and competencies with respect to the reformulated performance areas outlined in this report. These factors will be important to take into consideration in ongoing staff and resource management efforts.

Table 3 – Assessment of Program Capabilities in Revised Performance Areas

| PERFO | RMANCE AREA                | CURRENT CAPACITY     | KEY CONSIDERATIONS  |
|-------|----------------------------|----------------------|---|
| I.    | Energy<br>Performance      | EXISTING<br>STRENGTH | <ul> <li>Historically strong and successful energy programs</li> <li>Ongoing market interest in efficiency and GHG reduction</li> <li>Ongoing market need for increasing knowledge of best practices and access to technology/service solutions</li> </ul>  |
| II.   | Water Stewardship          | EMERGING<br>STRENGTH | <ul> <li>Industry awareness of and interest in water issues has grown significantly since program inception</li> <li>Emerging Low Impact Development (LID) requirements and more aggressive municipal water targets/protection standards shifting policy</li> <li>Opportunity to minimize overlap with underlying objectives of "Green Site" initiatives</li> </ul> |
| III.  | Waste<br>Management        | EMERGING<br>STRENGTH | <ul> <li>Research into existing corporate spending on waste management suggests issue has greater perceived importance than historically acknowledged</li> <li>Early efforts to facilitate resource exchange within the <i>Eco-Business Zone</i> showing promise</li> </ul>   |
| IV.   | Communication & Engagement | EXISTING<br>STRENGTH | <ul> <li>Sustained business interest in support for employee engagement and capacity building</li> <li>Broad sector coverage and business relationships offer strong pathways for ongoing engagement</li> <li>Growing aptitude for large-scale mobilization campaigns</li> </ul>  |

#### **ACTION #2: STREAMLINE PROGRAM DELIVERY STRUCTURE**

This strategy is aimed at ensuring program resources are driving performance around a new suite of indicators that meet criteria outlined in **Figure 9**, and to enhance accountability and execution through program governance.

A cohesive framework that enables Partners in Project Green to track progress towards agreed upon goals will not only help assess performance, but will demonstrate value to municipal and private partners. This performance measurement system will assign high level performance metrics to financial health as well each Performance Area. The Program Evaluation Dashboard (Figure 11) will ensure that all organizational activities are explicitly linked to at least one strategic priority.

Partners in Project
Green Vision

[Relevant
Programs]

Figure 12 - Alignment of Programs, Metrics and Vision

Criteria for development may include:

- Measurable targets that are aligned with Partners in Project Green vision and new key performance areas
- Can be used to set program baselines and ongoing performance
- Serve as useful leading indicators to drive strategic evolution of Partners in Project Green (i.e. as major indicators move up/down, program design/investment can evolve accordingly)
- Constructive basis for managing all levels of Executive and Performance Committee activities
- Feasible to monitor and report regularly (approximately quarterly) against

It is recommended that a focused multi-stakeholder working group be struck to devise specific performance metrics for the program. This working group should consist of Partners in Project Green and TRCA staff, and select Executive Management Committee members.

In addition to revising program metrics, streamlining and modifying team roles and relationships in ways that empower contributors to apply their diverse skill sets more effectively, be more accountable to program results, and derive greater value from their participation in *Partners in Project Green* is recommended. To this end, the following governance structure was devised (**Figure 13**) requiring business and municipal leaders to take on dual roles: 1) steering the overall Partners in Project Green strategy and 2) providing leadership in key performance areas.

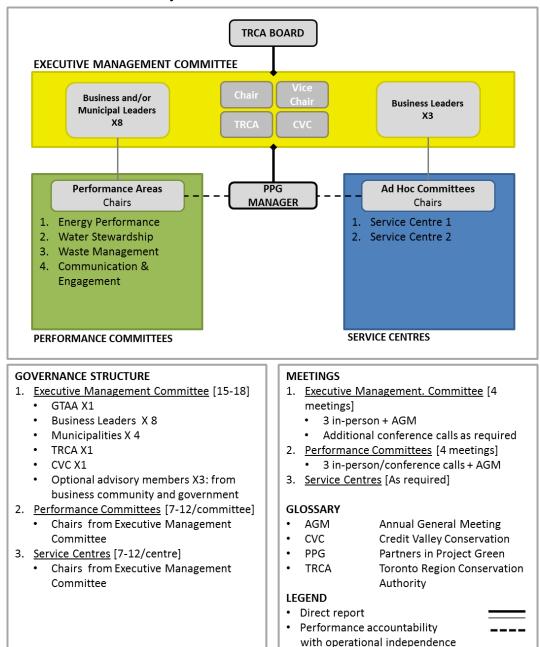

Figure 13 – Revised Partners in Project Green Governance Structure

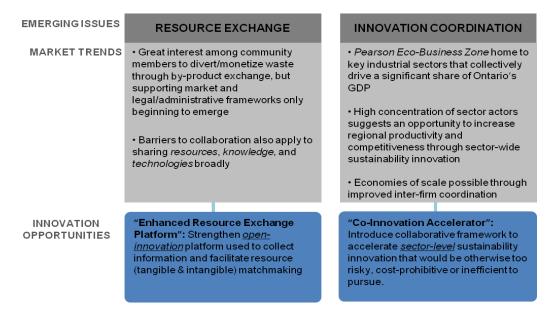

Please see **Appendix E** for additional information.

#### **ACTION #3: LAUNCH NEW SERVICE CENTRE DIVISION**

This strategy identifies opportunities to better leverage *Partners in Project Green's* unique relationships, brand and capabilities to serve stakeholders through a new class of arms-length, semi-autonomous "Service Centres." The Service Centre model is intended to elevate focus on capturing economic value from efforts to meet sustainability support needs of organizations. As illustrated in **Figure 14**, this section proposes

focusing on two areas where *Partners in Project Green* is already building capabilities for addressing: *Resource Exchange* and *Innovation Coordination*.

Figure 14 – Service Centre Approach to Meeting Sustainable Market Transformation Needs

As is discussed in greater depth in subsequent sections, the proposed service centres have the potential to become highly visible and financially self-sustaining program elements. Note that the proposed *Service Centres* steer away from "traditional" consulting-style support services – a market which is extremely fragmented, competitive and requires deep capacity that can be both costly and time-intensive to cultivate, with little certainty of returns or process efficiencies and replicability. In contrast, the *Service Centre* model aims to capitalize on creative, high-impact opportunities for serving market gaps that address regional environmental priorities at scale – solutions which take advantage of the Program's provenance as an integral part of a leading conservation authority, and a trusted "*broker*" and "*curator*" of knowledge and solutions in the marketplace.

Please see **Appendix E** for additional information.

# 4. IMPLEMENTATION

# **Implementation Timeline**

| Year | Sharpen Program Focus                             | Enhance Innovation                               | Streamline Delivery   |
|------|---|--|---|
| 2013 | Develop Performance Metrics                       | Develop Service Centre Models                    | Adopt new governance structure                                    |
|      | Create Program Evaluation Dashboard               | Carry Out Feasibility Studies                    | Install Executive Committee members and Advisory Committee chairs |
|      | Rationalize unaligned and ineffective programming |  |   |
|      | Restructure continuing programs                   |  |   |
| 2014 |   | Develop 1 <sup>st</sup> Service Centre Structure |   |

| 2017 |   |  |   |
|      |   |  |   |
|      |   |  |   |

**THEME #1: Sharpen Program Focus Areas** 

| RECOMMENDED ACTIONS                             | IMPLEMENTATION STEPS  | OWNER(S)    | TARGET<br>COMPLETION |  |
|---|---|-------------|----------------------|--|
| 1. Streamline Program Focus Areas (Section 3.2) | <ul> <li>Present revised performance areas as<br/>outlined in Section 3.2 to Executive<br/>Management Committee for review<br/>and approval.</li> </ul>   | PPG Manager | February 2013        |  |
|   | ii. Conduct internal review of all key communications/promotional material to align messaging around new performance areas; seek ways to elevate visibility to new areas (and associated metrics) across all program outreach activities. | PPG Manager | May 2013             |  |
| a. Streamline Programs (Section 3.2.1)          | <ul> <li>iii. Rationalize existing programming and<br/>develop new programming. Present<br/>results to Performance Committee<br/>chairs for review.</li> </ul>  | PPG Manager | May 2013             |  |
|   | iv. Update website accordingly to reflect refreshed program roster.   | PPG Manager | June 2013            |  |

THEME #2: Streamline Program Delivery Structure

| RECOMMENDED ACTIONS  | IMPLEMENTATION STEPS  | OWNER(S)    | TARGET<br>COMPLETION |  |
|--|---|-------------|----------------------|--|
| 2. Streamline Program Delivery Structure (Section 3.3)               | <ul> <li>i. Present proposed changes to<br/>organizational structure and roles and<br/>responsibilities to the Executive<br/>Management Committee; update terms<br/>of references for all program support<br/>roles.</li> </ul> | PPG Manager | February 2013        |  |
| a. Re-Design Program Metrics (Section 3.3.1)                         | ii. Assemble cross-functional Performance<br>Metrics Committee (by invitation and<br>appointment).  | PPG Manager | April 2013           |  |
| (Section 3.3.1)  | iii. Complete due diligence on appropriate metrics for each new performance area via Design Charrette and formal schedule of working meetings.  | PPG Manager | TBD                  |  |
|  | iv. Match new performance metrics to updated set of program activities.   | PPG Manager | TBD                  |  |
| b. Optimize Program Steward Roles & Responsibilities (Section 3.3.2) | v. Commence recruitment of new support team members and/or engage existing parties on (potentially) revised roles as defined in updated terms of reference.   | PPG Manager | April 2013           |  |

**THEME #3: Enhance Innovation Capacity** 

| RECOMMENDED ACTIONS   | IMPLEMENTATION STEPS  | OWNER(S)    | TARGET COMPLETION |
|---|---|-------------|-------------------|
| 3. Launch New Service Centre Division (Section 4.4)                           | <ul> <li>Develop internal staffing strategy and<br/>team structure to support new<br/>Service Centre proposals.</li> </ul>                                  | PPG Manager | June 2013         |
|   | ii. Review 2013+ budget allocation to embed assumptions for necessary staff/physical overhead to support Service Centre models (postfeasibility study).     | PPG Manager | June 2013         |
|   | iii. Conduct feasibility studies to develop service scope for each Service Centre concept proposed; allocate 2013 budget for feasibility studies specified. | PPG Manager | TBD               |
| a. "Resource<br>Exchange<br>Platform"<br>Feasibility Study<br>(Section 3.4.1) | iv. Define parameters for project feasibility study, using preliminary terms outlined in <b>Appendix E</b> ; issue tender for services.                     | PPG Manager | TBD               |
| b. "Co-Innovation<br>Accelerator" Roll-<br>Out<br>(Section 3.4.2)             | v. Define parameters for project feasibility study, using preliminary terms in <b>Appendix E</b> ; issue tender for services.                               | PPG Manager | TBD               |

#### 5. CONCLUSION

The strategy update process reaffirmed that *Partners in Project Green's* core value proposition remains relevant to program constituents. Despite awareness of and engagement in sustainability having grown significantly since program inception, *Pearson Eco-Business Zone* members continue to express a desire for supplemental support, although in areas that have evolved since program inception.

Having established itself as a trusted resource for sustainability best practices, relationship brokering, and coordinating multi-stakeholder initiatives, *Partners in Project Green* is well positioned to continue playing a valuable support role for enhancing firm performance.

The review process has underscored several areas for improvement that will help ensure the Program's strengths and resources are more efficiently and effectively leveraged to meet evolving stakeholder needs. As **Figure 15** suggests, each recommended action differs in terms of ease of implementation and opportunities for measurable payback (monetary/non-monetary and quantitative/qualitative). This assessment can assist efforts to prioritize or phase-in specific recommendations over time based on the availability of resources.

Figure 15 - Summary of Strategic Recommendations

### 6. APPENDICES

#### APPENDIX A: INDEX OF SUPPORTING PRESENTATIONS & CHARRETTE PARTICIPANTS

The development of this strategy update involved several consultative phases and analytical exercises that have helped inform program recommendations. Below is an index of companion PowerPoint and Excel files that serve as a record of key reporting and strategy development phases. Note that — due to the timing/release date of each file — contents may vary from recommendations and analysis contained in this report.

Table A-1 - Index of Supporting Presentations & Files

| FILE NAME  | FILE TYPE  | DATE          | DESCRIPTION  |
|--|------------|---------------|--|
| PPG Strategy Update Draft Themes (Updated)_12-10-2012      | PowerPoint | Dec. 10, 2012 | Draft strategy update themes presented to TRCA Executive   |

#### **APPENDIX B: PROGRAM PARTICIPATION ANALYSIS**

This section provides an analysis of program performance based on participation as of September 2012. It is important to note that statistics referenced in **Figures B-1** and **B-2** should be taken as "directional" in nature only, owed to inconsistencies in data collection, categorization and comparison across various data sources. Despite these limitations, we can still arrive at general insights regarding program uptake that can help inform future programming decisions.

#### \*ASSUMPTIONS:

"Discreet" counts refer to individual entries in the Partners in Project Green database; that is, members of the same organization, as well as an individual's participation in multiple activities/events are counted and reported as discreet events.

|  | NAICS<br>Category | # of<br>Companies<br>(Pearson) | Assistance<br>Program | Education<br>Workshop | Financial<br>Assistance<br>Program | Networking<br>Event | TOTAL<br>Activities |
|--|-------------------|--------------------------------|-----------------------|-----------------------|------------------------------------|---------------------|---------------------|
| Chemical & Plastics Manufacturing      | 325               | 296                            | 55                    | 37                    | 0                                  | 13                  | 105                 |

Figure B-2 - Program Participation (Discreet Company Count\*\*) by NAICS Category

#### \*\*ASSUMPTIONS:

Unlike **Figure X**, this graph displays counts of <u>individual</u> organizations that have participated in PPG activities, as well as an approximation of the "% Uptake" of companies within a given main NAICS category. Owed to database incompleteness, many database entries have been manually assigned categories, and thus, should not be viewed as representing "official" statistics.

|                                    |          | NAICS<br>Category | # of<br>Companies<br>(Pearson) | # of Companies Engaged in ANY PPG Activity | % Uptake in<br>Category |
|------------------------------------|----------|-------------------|--------------------------------|--|-------------------------|
| Chemical & F Manufacturing         | Plastics | 325               | 296                            | 53   | 18%                     |
| Construction<br>Infrastructure     | &        | 238               | 696                            | 86   | 12%                     |
| Food, Beverage & Manufacturing     | Pharm.   | 311               | 166                            | 85   | 51%                     |
| General<br>Manufacturing           |          | 323               | 2,214                          | 209  | 9%                      |
| Hospitality<br>Accommodations      | &        | 722               | 418                            | 24   | 6%                      |
| Professional<br>Services           |          | 561               | 2,242                          | 366  | 16%                     |
| Transport., Distr<br>& Warehousing | ibution  | 484               | 925                            | 70   | 8%                      |
| Other/<br>Unclassified             |          | 44                | 5,497                          | 234  | 4%                      |
|                                    |          | TOTAL             | 12,454                         | 1,127                                      |                         |

It is important to note that a complete assessment of program effectiveness needs to also take into account additional tangible (i.e. positive environmental impacts) and intangible (i.e. strategic relationships forged, brand awareness/strength etc.) outputs other than program participation. What this analysis does reveal, however, is that in most program areas, the level of penetration among businesses in the *Pearson Eco-Business Zone* is relatively low and would benefit from more targeted and aggressive outreach to engage segments of the business community that are currently not aware of, or are not sufficiently compelled to participate in available programs.

# APPENDIX C: ORIGINAL PARTNERS IN PROJECT GREEN PROGRAM TARGETS

**Table C-1 – Original Program Targets** 

| Focus Area        | Target   |  |  |  |  |
|-------------------|--|--|--|--|--|
|                   | Reduce energy consumption for building-related activities by 20 per cent by 2015.                  |  |  |  |  |
|                   | Ten per cent of all energy generating capacity to come from renewable energy by 2015.              |  |  |  |  |
| F                 | Reduce GHG emissions by six per cent below 1990 levels by 2014 and 15 per cent below               |  |  |  |  |
| Energy            | 1990 levels by 2020.   |  |  |  |  |
|                   | Ten per cent of the existing building area in the Pearson Eco-Business Zone will be green          |  |  |  |  |
|                   | retrofitted by 2015.   |  |  |  |  |
|                   | Increase employment densities to align with Provincial Growth Plan (to be confirmed after          |  |  |  |  |
|                   | completion and approval of Region of Peel Official Plan Review).                                   |  |  |  |  |
|                   | Develop and implement a Green Business Retention and Attraction Strategy for the <i>Pearson</i>    |  |  |  |  |
| Green Business    | Eco-Business Zone that takes into account both existing sectors and the clean technology           |  |  |  |  |
|                   | sector.  |  |  |  |  |
| Development       | Work with the following key sectors: automotive supply chain, transportation and logistics,        |  |  |  |  |
|                   | food processing, plastics and airport related to transform them into the greenest in their class   |  |  |  |  |
|                   | globally.  |  |  |  |  |
|                   | Increase ISO-certified 14000 businesses by 25 per cent by 2015. (Currently 11 within the area.)    |  |  |  |  |
|                   | Increase the number of new green buildings in the <i>Pearson Eco-Business Zone</i> by 300 per cent |  |  |  |  |
| Green Development | by 2015. (Currently there are 4 certified green buildings.)  |  |  |  |  |
| Green Development | Twenty per cent of impervious parking area to be converted to feature onsite SWM controls          |  |  |  |  |
|                   | by 2015.   |  |  |  |  |
|                   | Region of Peel (Official Plan): reduce per capita water consumption by 10 -15 per cent by          |  |  |  |  |
|                   | 2025.  |  |  |  |  |
| Water and Waste   | City of Toronto (Water Efficiency Plan) target reductions by 2011:                                 |  |  |  |  |
| Water             | <ul> <li>Peak day 275 ML/d (~13%)</li> </ul>   |  |  |  |  |
| water             | <ul> <li>Avg. annual day 150 ML/d (~11%)</li> </ul>  |  |  |  |  |
|                   | <ul> <li>Wastewater Flows 86ML/d (~9%)</li> </ul>  |  |  |  |  |
|                   | <ul> <li>Irrigation (ICI only) 7ML/d (~12%)</li> </ul>   |  |  |  |  |
|                   | Increase by 50 per cent the number of employees participating in Smart Commute initiatives         |  |  |  |  |
|                   | by 2015. (Currently five members.)   |  |  |  |  |
| Transportation    | Initiate a research organization to develop and share better information on goods movement.        |  |  |  |  |
|                   | Reduce GHG emissions from freight to be six per cent below 1990 levels by 2014, 15 per cent        |  |  |  |  |
|                   | below 1990 levels by 2020.   |  |  |  |  |
|                   | Implement all TRCA-identified restoration sites by 2015.   |  |  |  |  |
|                   | Increase the number of private-sector partnerships for natural heritage and open space             |  |  |  |  |
|                   | stewardship to 25 companies per year over the next three years, increasing by 10 per cent a        |  |  |  |  |
| Green Space       | year thereafter.   |  |  |  |  |
|                   | No net loss of natural heritage areas/features.  |  |  |  |  |
|                   | Increase riparian vegetation to a minimum of 75 per cent through the <i>Pearson Eco-Business</i>   |  |  |  |  |
|                   | Zone by 2015.  |  |  |  |  |

<sup>\*</sup>Key Sectors: Logistics, Food Processing, Automotive, Plastics, Pharmaceuticals

## **APPENDIX D: COMPLEMENTARY DELIVERY AGENTS**

Partners in Project Green has an established network of private sector partners, which can be called upon – through more strategic/purposeful relationships – to help evaluate and/or deliver new programming and Service Centre propositions outlined in Section 3 of this report.

Table D-1 – Existing External Partner Relationships

| _ | Clinton Climate Initiative | _ | Greening Greater Toronto/Civic Action |  |  |

CYC is a program of Credit Valley Conservation. | The CYC Summer Program gives High School students the chance to do volunteer work that benefits the local environment. It does this in a way that maximizes your opportunity to learn about certain environmental and conservation issues, your ability to positively contribute directly to something meaningful and worthwhile, and our ability to provide this opportunity to as many youth in our watershed as possible. | Programs  CYC Summer Program: Volunteer with CYC on a weeklong volunteer work term and earn up to 35 of your Community Involvement Hours required for graduation. For more information or to register for this program follow the links.  Branch Out!: The Conservation Youth Corps "Branch Out!" Program enhances the secondary science and geography curriculum and raises students' awareness about local climate change issues. Students are inspired to discover nature in their community and participate in a community stewardship project. | Funded by Region of Peel  Full List of Event Sponsors: http://www.credit valleyca.ca/cyc/su pporters.html |

### **APPENDIX E: KEY RECOMMENDATIONS: SUPPORTING ACTIVITIES**

### **ACTION #1: SHARPEN PROGRAM FOCUS**

## **Supporting Action: Streamline Programs**

### **KEY ACTIONS:**

- Streamline program mix to better leverage existing/emerging internal competencies to achieve desired market impact (as per **Figure 15**).
- Retire programs that have had limited uptake and impact relative to resources required to sustain them.
- Consolidate programs where opportunities for thematic and operational efficiencies exist.

### **SPOTLIGHT: The People Power Challenge**

Partners in Project Green businesses have seen the positive impact of community challenge/campaign models. Between November 1, 2012 and October 31, 2013, companies will be competing in the People Power Challenge – a campaign that engaged employees around ways to improve their company's environmental performance and reduce its costs. Three Challenge areas exist throughout the year: Green Procurement, Green Building, and Transportation.

#### **ACTION #2: STREAMLINE PROGRAM DELIVERY STRUCTURE**

### **Supporting Action: Optimize Program Steward Roles & Responsibilities**

This section provides recommendations for streamlining and modifying team roles and relationships in ways that empower contributors to apply their diverse skill sets more effectively, be more accountable to program results, and derive greater value from their participation in *Partners in Project Green*.

The tables to follow provide specific guidance on modified terms of reference that can be employed to manage relationships with program stewards. **Figure E-1** provides a high level summary of key proposed role amendments for each group.

#### Figure E-1 – Highlights of Program Steward Role Modifications

- Executive Management Committee: Expanded original Executive Committee membership and roles to more engaged business leadership (see Table E-1).
- **Steering Committee:** Merged with Project Teams and enhanced for sector specific engagement and leadership through new Performance Committees.
- Project Teams: Merged with Steering Committee to form new Performance Committees.
- Performance Committees: More fluid engagement and targeted participation to aid program deployment and pursuit of targets (see Table E-2).

- Service Centres: New division requiring dedicated support structure and relationships to deliver expertise, client pipelines and execution capacity required to support envisioned mandates (See Table E-3).
- Core Program Staff: Heightened focus on providing consistent and focused *Community Engagement & Marketing, Member Engagement, Knowledge Management & Reporting* support to drive operational excellence across all program initiatives (see Table E-4).

Table E-1 – EXECUTIVE MANAGEMENT COMMITTEE

| OVERVIEW  | KEY ROLES  |
|---|--|
| Responsible for:  A. Assisting businesses in the Pearson Eco-Business Zone to improve their financial and environmental performance.  B. Retaining and attracting green investment in the Pearson Eco-Business Zone.  C. Acting as a catalyst for new ideas, innovation, excellence and improvement in the Pearson Eco-Business Zone. | <ul> <li>Providing leadership and communication among Partners in Project Green members and supporters;</li> <li>acting as a spokesperson for Partners in Project Green;</li> <li>reviewing and approving the Partners in Project Green strategy and programs as required;</li> <li>approving the Partners in Project Green budget;</li> <li>monitoring overall Partners in Project Green priorities and performance;</li> <li>publishing an annual report;</li> <li>providing legal, governance and issue-resolution guidance relating to Partners in Project Green activities. facilitating access to strategic partners and advisors;</li> <li>where appropriate, serving as a resource and contact for media and government relation inquiries;</li> <li>appointing Chairs to Performance Committees and Service Centres; and</li> <li>facilitating and directing resources to Subcommittees.</li> </ul> |
| PROFILE/PARAMETERS  | <ul> <li>Consist of 15 Voting Members including a Chair and Vice-Chair, representatives of the founding agencies (TRCA, GTAA, Region of Peel and the City of Toronto), strategic partners, members of the business community and a number of government representatives.</li> <li>Meet at least four times per year including the Annual General Meeting, roughly every three months.</li> <li>2 year, renewable terms.</li> </ul>   |

Table E-2 – PERFORMANCE COMMITTEES

| OVERVIEW                                  | KEY ROLES   |  |  |
|---|---|--|--|
| Responsible for:                          | • Advising staff on key <i>Partners in Project Green</i> sector specific issues;  |  |  |

| Partners in Project<br>Green vision and   | <ul> <li>providing market intelligence and recommendations for new<br/>performance area program opportunities;</li> </ul>                                 |  |  |

| Executive Management Committee mandate; B. and, contributing to the successful development and implementation of new and existing Partners in Project Green programs. | <ul> <li>where appropriate, leading the design and/or execution of initiatives in line with <i>Partners in Project Green</i> strategic objectives;</li> <li>own program performance metrics and report progress to the Executive Management Committee; and,</li> <li>serving as ambassadors for the program among peer/industry groups.</li> </ul> |
|---|--|
| PROFILE/PARAMETERS  | <ul> <li>Consist of 7 -12 members including a Chair and Vice-Chair.</li> <li>Senior management, senior municipal staff and/or subject area specialist participants.</li> <li>Meet at least four times per year including the Annual General Meeting, roughly every three months.</li> <li>2 year, renewable terms.</li> </ul>                      |

# **Table E-3 – NEW SERVICE CENTRES**

| OVERVIEW  | KEY ROLES   |
|---|---|
| Ensure effective delivery and capturing fair market value for core services delivered to users. | <ul> <li>Contributing to the successful development and implementation of new and existing <i>Partners in Project Green</i> self-sustaining profit centres;</li> <li>Contributing to the realization of the Executive Management Committee's update.</li> </ul> |
| PROFILE/PARAMETERS  | Service Centres will draw on a targeted network or key delivery agents and partners, as defined by individual project feasibility studies.  |

# Table E-4 – CORE PROGRAM STAFF

| OVERVIEW   | KEY ROLES   |
|--|---|
| Provide facilitation, project and program development and implementation, research and policy analysis, administrative support, financial management and communications. | <ul> <li>Provide core operations services to support key program areas, with a focus on:         <ol> <li>Community Engagement &amp; Marketing</li> <li>Member Engagement</li> <li>Knowledge Management &amp; Reporting</li> </ol> </li> <li>Create an environment where key internal and external program stakeholders/contributors have clarity of expectations and can excel in their individual functions, specifically through:         <ol> <li>Leading program reporting (qualitative and quantitative performance; tracking towards targets and objectives etc.)</li> <li>Maintaining active participation in all committees, consortiums and service centres underpinning the program</li> </ol> </li> </ul> |
|  | <ul> <li>Ensuring consistency in branding, quality of initiatives and</li> </ul>  |

|                    | cultural experience across all program elements   |
|--------------------|---|
| PROFILE/PARAMETERS | Core Staff Functions:   |
|                    | Specialist/Program Director   |
|                    | o *Manager  |
|                    | o *Project Manager: Technical Services  |
|                    | <ul> <li>*Project Manager: Community Development</li> </ul>   |
|                    | Project Coordinators  |
|                    | Supporting Functions:   |
|                    | <ul> <li>Program Administration</li> </ul>  |
|                    | <ul> <li>Program Interns</li> </ul>   |
|                    | o TRCA Support Staff  |
|                    | *Ownership of core functional areas of excellence to be distributed among program staff: Community Engagement & Marketing, Member Engagement, Knowledge Management & Reporting. |

# **Supporting Tactic: Apply Campaign Model to Advance Performance Areas**

Over the years, *Partners in Project Green* and peer initiatives have developed a competency for driving action through highly visible education and outreach campaigns that often involve an element of friendly competition. While such efforts can run the risk of not sustaining post-campaign momentum, the availability of concrete tools and programs to facilitate enduring impact sets *Partners in Project Green* apart as an effective campaign leaders. As such, past success administering outreach campaigns can be employed to mobilize greater action around program performance areas. Campaign best practices to strive for may include:

- 1. Packaging available programs into intuitive clusters that respond to "benefit-led" motivators for action (i.e. "Efficiency," "Low Impact," "Culture Shift").
- 2. Leveraging social media/campaign management strategies that strength social connections around goals.
- 3. Making greater use of multi-media/alternative story-telling vehicles to strengthen community action bonds.
- 4. Ensuring clear, manageable metrics ground all activities, and providing tangible and intangible rewards to recognize achievements.
- 5. Strengthen links between campaigns and specific supporting programs and resources

### **Supporting Tactic: Project Innovation Fund Launch**

As project teams and consortiums meet over the course of a year, new ideas for impact are generated on a regular basis, yet few are seen through to implementation. This is largely due to limitations in human and financial capital that may be required to drive ideas forward. This challenge can be mitigated through the creation of a designated "Project Innovation Fund," which offers a streamlined, internal application process

to award teams with discretionary resources (both dollars and staff time) to drive forward initiatives that meet specific requirements for projected impact and accountability for achieving results.

# **ACTION #3: LAUNCH NEW SERVICE CENTRE DIVISION**

# **Supporting Action: Resource Exchange Platform Feasibility Study**

### PRELIMINARY FEASIBILITY STUDY DISCOVERY AREAS: Resource Exchange Platform

- 1. Open innovation platform scope should explore expanded possibilities to facilitate commercial exchange of both physical assets (i.e. waste/resources, technology etc.) and intangible assets (i.e. knowledge capital, process IP etc.) with corresponding pricing mechanisms, exchange norms and legal parameters to support such models.
- 2. Platform models should employ open innovation best practices to facilitate "deal flow" between "buyers" and "seekers" that do not have existing commercial relationships, covering areas like:
  - a. Information/user privacy
  - b. Intellectual property protection
  - c. User interface
  - d. Campaign/promotion strategies etc.
- 3. Evaluate pros/cons and feasibility of different activity areas to be supported by a *Partners in Project Green* open innovation network (acknowledging potentially different sector and staff/user types for each), investigating such exchange scenarios as:
  - a. Technology procurement
  - b. Intellectual property acquisition
  - c. Technology/intellectual property licensing
  - d. Strategic match-making etc.
- 4. Define knowledge/staff capabilities required to sustain different platform activities, including but not limited to capabilities related to:
  - a. Technology seeking and evaluation
  - b. Deal management and relationship brokering
  - c. Platform promotion and user engagement
- 5. Conduct economic modeling required to evaluate alternative delivery models, including but not limited to such revenue generation scenarios as:
  - a. Subscription-based
  - b. Commission-based or transaction fee-based (i.e. successful matching)
  - c. Equity-based (i.e. partial ownership of new IP developed through platform)
  - d. Sponsorship-based etc.

### PRELIMINARY FEASIBILITY STUDY DISCOVERY AREAS: Co-Innovation Accelerator

- 1. Define alternative models for organizing structuring/managing larger scale, multi-site pilots via a *Partners in Project Green*-administered co-innovation hub. The hub will provide an efficient "meeting place" between providers of sustainable technology solutions and potential technology end-users, facilitating such outcomes as:
  - a. Raising awareness and promoting uptake of emerging leading edge and potentially "disruptive" solutions at scale, which otherwise would be cost-prohibitive and/or infeasible to access for individual organizations.
  - b. Coordinating technology pilots that showcase local cleantech innovations with market transformation potential.
  - c. Streamlining and standardizing the collection of performance data across multiple sites and testing environments to aid performance evaluation via joint testing or technology verification/certification.
  - d. Reducing financial risk/burden of pilot projects by facilitating access to government grants, access to capital and risk under-writing etc.
- 2. Develop strategy for forging relationships with prospective hub collaborators, targeting:
  - a. Cleantech community stakeholders with solutions that are aligned with *Partners in Project Green* key performance areas.
  - b. Prospective buyers/users of technologies in key *Partners in Project Green* industry sectors (companies, municipalities, government ministries etc.).
  - c. Academic/technology evaluation institutions and programs.
- 3. Establish "terms of reference" for hub participants, with an aim to facilitate multiple site pilots to accelerate technology uptake and generate economies of scale. Terms of reference should cover such areas as:
  - a. Solution/pilot scoping process.
  - b. Technology costing/bulk procurement terms.
  - c. Access to information, collection of performance data norms.
  - d. Legal/liability considerations.
- 4. Develop stakeholder map of strategic cleantech industry and data intermediaries that can provide access to high-quality, targeted information on technologies and technology providers in key *Partners in Project Green* performance areas (i.e. BLOOM, SDTC, ISTP, Cleantech Venture Network etc.).
- 5. Define internal capacity/staffing needs to sustain hub activities, including:
  - a. Scanning the market for new technologies most pertinent to *Pearson Eco-Business Zone* performance in key *Partners in Project Green* performance areas.
  - b. Developing relationships with sector stakeholders (technology, user, academic, government groups etc.) to evaluate and seek technology pilot opportunities.
